BIOGRAPHY

Lee Broom is one of the UK's leading product designers. With his highly original brand of luxury furniture and lighting designs, his work is recognised and retailed across the globe. In the last ten years since he founded the company, Broom has created over 100 furniture, accessory and lighting pieces, all of which are designed, manufactured and retailed under the Lee Broom brand. Broom has also designed products and interiors for other leading global brands including Christian Louboutin and Mulberry alongside designing over 45 commercial retail, restaurant and bar interiors. Most recently Broom has partnered with British heritage brand Wedgwood to create a prestige capsule collection of collectable Jasperware.

Broom's creative career began when he was a child actor performing in many TV shows and theatre productions, including being a member of the Royal Shakespeare Company. At the age of 17 he won the 'Young Fashion Designer of the Year Award' which changed his focus and led him to work alongside Vivienne Westwood before moving on to study fashion at Central Saint Martin's. After graduating Broom opened an interior design practice for four years after which he set up his eponymous brand 'Lee Broom' in 2007 launching his very first furniture and lighting collection which showcased during The London Design Festival and firmly established his name in the industry as the one to watch with products that are both unique and familiar.

Winning over 20 awards to date, including British Designer of the Year and The Queen's Award for Enterprise presented by Her Majesty The Queen in 2015, the past ten years have seen the brand grow rapidly. By creating a highly original collection of coveted products and a Lee Broom universe, making the brand an experience for people to become part of, Broom has made design a successful global business with products retailed in over 250 stores in 48 countries around the world alongside his own flagship showrooms in London and New York.

LIGHTING

OPTICAL

Op Art graphic patterns are the inspiration for this modern pendant light. Made from powder coated spun steel and blown from opaque glass, the asymmetry of the black stripes are in contrast to the classic spherical shape of the globe. When viewed from all sides, Optical's linear pattern changes at every angle.

Optical is also available as a table lamp and floor lamp, placing the glass sphere on a ring base and atop a slender rod base respectively to create a family of graphic lighting elements.

CRESCENT

A new twist on the classic globe light, Crescent Light is an illuminated sphere sliced asymmetrically in half to reveal a crescent-shaped brushed brass fascia. At 40cm/16 inch diameter and containing a high power LED bulb, Crescent Light has presence and luminosity, seamlessly combining the solid and the opaque.

Also available is the Crescent Table Lamp, nestling the sliced sphere on a ring of brushed brass.

Mini Crescent, at 20cm/8 inch diameter, provides a smaller alternative to Crescent. Options include a pendant, ceiling light, three tier chandelier, five tier chandelier and table lamp.

MINI CRESCENT

A miniature version of the popular Crescent Light, this illuminated sphere is sliced asymmetrically in half to reveal a crescent-shaped brushed brass fascia. Mini Crescent Light seamlessly combines the solid and the opaque.

Further options available include Mini Crescent Chandeliers, composed of three or five pendants hung from a single satin white canopy and the Mini Crescent Ceiling Light, which allows the shade to be mounted directly on the ceiling. Completing the family is Mini Crescent Table Lamp.

FULCRUM LIGHT

Continuing the exploration of pivots and supports, Fulcrum Light is a slimline and elegant pendant of polished brass, polished chrome or, new for 2017, satin black cylinders suspended around a central sphere. The exposed light bulb symmetrically mimics the silhouette of the sphere.

Also available as a three piece chandelier and five piece chandelier with satin white ceiling plate.

CAROUSEL

Inspired by the merry-go-round ride of a traditional British fairground, Carousel is a pendant light with a heavyweight presence that floats gently in space. Cylinders of polished gunmetal, polished brass, polished chrome or, new for 2017, satin black, each house an inset LED lighting element resulting in a spectacular yet playful ring of light.

Carousel is available in 60cm/24 inch and 120cm/48 inch versions and is suspended from a matching circular ceiling plate by steel suspension wires.

RING

A polished brass sphere, pierced by a dimmable circular fluorescent tube to form Ring Light, a pendant that elevates the utilitarian bulb to become the decorative focal point of a jewel-like light. Delicately formed of three simple shapes, Ring Light is more than the sum of its parts and is a striking and elegant fitting.

This product is only available in 220-240v.

ONE LIGHT ONLY

One Light Only (OLO) is a collection of striking pendant lights that draw on Lee Broom's fashion background. Characterised by its gem-like faceted exterior, OLO references both Art Deco jewellery and late 1970's fashion photography.

OLO is presented in two finishes - matt white and matt gold - producing sharp lines and graphic, angled shadows on its surface. A polished gold interior ensures a warm glow is emitted on all.

OLO is available in two sizes and works equally well in clusters or as a standalone piece.

CHAMBER

Housing a sculptural Carrara marble diffuser within a lead crystal vessel, Chamber expresses the unexpected translucent qualities of marble in a compelling decorative pendant. With its gentle luminosity and directional downlight, Chamber is available in two sizes and lends itself to being hung in clusters as well as individually.

Also available as a three piece chandelier and five piece chandelier with satin white ceiling plate.

GLOBE

A seemingly solid half-sphere of Carrara marble is topped by a dome of lead crystal. This 40cm/16 inch diameter table lamp creates a robust presence yet emits a beautiful light from a LED bulb set inside the base. This shines through the thin marble top, illuminating the unique patterns of the stone and casting an upward glow.

T U B E

Skillfully milled from a single piece of Carrara marble and finished at each end with bands of brushed brass, Tube contains a strip of LED light source resulting in what appears to be a solid length of warm glowing stone. The unique veins of each piece of marble means no two lights are exactly the same. A handcrafted twist on the traditional fluorescent tube light.

Also available as a wall mounted light.

CRYSTAL TUBE

Composed of a decoratively patterned length of hand-cut lead crystal capped at each end with brushed brass, Crystal Tube contains a slender LED light source resulting in a sparkling beam of light. A luxurious reimagining of the standard fluorescent tube light, Crystal Tube is suspended from both ends by a thin tensile wire allowing it to be hung horizontally or at an angle.

Also available as a wall mounted light.

CRYSTAL BULB

Taking inspiration from the delicate craftsmanship of crystal cutting, Crystal Bulb combines industrial influences with decorative qualities, transforming the everyday light bulb into a beautiful ornamental light fitting. Each lead Crystal Bulb is handcrafted using traditional techniques and hand cut with a classic crystal pattern inspired by traditional whiskey glasses and decanters.

The Crystal Bulb - winner of the British Design Award for 2013 - is available in a Clear or Frosted finish and the collection includes a brushed brass pendant, gold plated table lamp, three piece chandelier and five piece chandelier. The Crystal Bulb features a warm white LED, which can be replaced.

LEE BROOM

DECANTERLIGHT

Crafted from hand cut lead crystal, Decanterlights are inspired by the vintage drinks decanters found in a traditional British drawing room. Referencing three classic decanter shapes, the Square, Bell and Tulip pendants produce a warm, welcoming glow and refracted light casts intricate shadows on surrounding surfaces. A five-piece and three-piece chandelier suspends a selected mix of shades at different heights to create a stunning lighting centerpiece.

Decanterlights are also available in a straight cut version, using the same decanter vessels with a vertical cut pattern to add a modern twist.

ACID MARBLE LAMP

A layer of white Carrara marble and acid yellow tinted glass are sandwiched together to form an illuminated circular diffuser for the sculptural Acid Marble Table Lamp. Set into a solid Nero Marquina marble base, the veins of the Carrara marble are visible through the glass allowing the marble to appear yellow, giving this very classic material a playful twist.

SHADOW LAMP

The Shadow Table lamp is a hand made contemporary piece playing with the concept of optical illusion with traditional crafted materials. Sitting around a brushed brass cylinder, a series of triangular facets run vertically around the cylinder with one side in American walnut and the other in brushed brass. From one angle the lamp appears to be all wood and from the other all brass depending on your view point all of which is illuminated under a black shade with a brushed gold metallic interior.

FURNITURE

TIME MACHINE

To celebrate a landmark decade in design, Time Machine is an exclusive statuesque marble grandfather clock. Hand-crafted from Carrara marble, the monolithic and commanding structure features a traditional engineered clock mechanism with solid brass pendulum, weight and hands. Limited to an edition of 10.

HANGING HOOP CHAIR

Suspended by a chain from above, two circular steel hoops join to create Hanging Hoop Chair, a modern swing chair with an iconic outline.

The angled inner hoop supports a padded backrest that is perfectly aligned with the hemispherical seat, both of which are upholstered in Kvadrat wool.

The frame is available in satin black and brass plated finishes.

SHADOW

The Shadow Cabinet, Side Table and Coffee Table are hand made contemporary pieces playing with the concept of optical illusion with traditional crafted materials. A series of triangular facets run vertically down the front of the cabinet with one side in American walnut and the other in brushed brass or black inlay. From one angle the Shadow pieces appear to be all wood and from the other all brass or black.

Sitting under a solid 3mm / 1/8 inch thick piece of brushed brass, the cupboards of the Shadow Cabinet are cleverly disguised within the vertical geometry.

The tops of the Shadow Side Table and Shadow Coffee Table have a star shaped pattern-using hand laid walnut veneer marquetry.

SPLIT MIRROR

A precision cut slice, shifted from its original position, reveals an oak trimmed section of the black frame on Split Mirror, a modern wall mirror with a distinct personality. Both the round and long variations of Split Mirror have been lacquered in a satin black finish to compliment the oak trim.

DRUNKEN

A play on the concept of pivots and supports, The Drunken Side Table is a sculptural and monolithic piece of furniture whose tabletop and asymmetric base appears to balance on a central sphere. Using mixed materials such as polished stainless steel and enamel with its palette of pop art colours in matt and gloss finishes, The Drunken Side Table is a playful piece for a post modern world.

ACID MARBLE

A layer of white carrara marble, Nero Marquina marble and acid yellow tinted glass are sandwiched together to form these modern, sculptural console and coffee tables. The veins of the Carrara marble top are visible through the glass allowing the marble to appear yellow, giving this very classic material a playful twist. The coffee table is elegantly balanced on a solid sphere of nero marble.

PARQUETRY

Parquetry is a traditional method of fusing wood together to form a decorative surface pattern. The Parquetry Coffee Table creates a stunning centerpiece that is incredibly tactile.

Combining a mix of wenge, walnut and oak veneer, the flashes of blue lacquer add a modern twist to this age old technique.

CARPETRY SIDEBOARD

The Carpentry Sideboard is inspired by the use of traditional Persian rugs within the British home. The carpet is 100% wool and is woven on traditional Wilton looms, a technique dating back to the 17th Century.

The carpet design draws inspiration from Persian nain rugs but uses a modern colour palette to introduce a contemporary feel to the design. The Persian rug has long been part of the British home so closer inspection reveals witty references to Britishness such as the Crown Jewels hidden within the pattern.

CARPETRY CONSOLE

The Carpentry Console is inspired by the use of traditional Persian rugs within the British home. The carpet is 100% wool and is woven on traditional Wilton looms, a technique dating back to the 17th Century.

The carpet design draws inspiration from Persian Nain rugs but uses a modern colour palette to introduce a contemporary feel to the design. ACCESSORIES

WEDGWOOD BY LEE BROOM

A prestige capsule collection of limited edition hand-crafted Jasperware vases and bowls, the Wedgwood by Lee Broom collection is a true showcase of craftsmanship and design.

With silhouettes and archetypal designs taken from Wedgwood's 250-year old archive, ornate detailing has been stripped back and the traditional Jasperware finish juxtaposed with postmodern elements to produce thoroughly cutting-edge versions of timeless classics limited to 15 editions of each four designs.

PODIUM

Podium is a collection of vases, which play with the sculptural quality of balance. Combining solid marble with transparent glass, they continue Lee Broom's fascination with bringing together opposing materials to create playful yet elegant pieces. Each of the three glass vessel shapes, globe, bowl and cylinder, are interchangeable between the round Carrara marble and square Nero Marquina marble bases, allowing the components to be selected in any combination desired.

Podium creates an impact whether filled with displays of flowers or left empty as a decorative element of beautiful materiality.

FULCRUM

A play on the concept of pivots and supports, Fulcrum is a sculptural and monolithic candlestick whose cylindrical stem appears to balance on a central sphere. Crafted from solid optical crystal, colour from the base refracts through each piece creating varying effects when viewed from different angle, whilst a clear version allows the surface it is placed on to influence the effect. Additional versions reimagine the form in solid Carrara marble and Nero Marquina marble.

The small Fulcrum is 30cm/12 inch tall and the large 40cm/18 inch.

ON THE ROCK

On The Rock combines delicate lead crystal with solid Carrara marble to form a glassware collection for the modern table. Elegant lead crystal vessels are fused to the marble bases creating a champagne coupe, wine glass and martini glass of contrasting but complementary materials.

HALF CUT

Half Cut cleverly repurposes crystal decanter stoppers as the bases of a stunning collection of champagne coupes and wine glasses. Lead crystal vessels are mounted on four distinctive, hand cut stopper designs to allow the option of matching or mixed sets.
