2021. The road map towards the future

**Kartell 2021.** Kartell 2021. A new path, further innovation not just in offering products but above all in giving meaning to the brand strategy which looks to the future, backed by the experience and the positive projects of the past.

**Kartell 2021.** An evolution of the brand and of its communication process through the extensive and complex distribution network consisting of its retail partners, digital platforms and relations with the contract world.

**Kartell 2021.** A creative workshop fuelled by the refined thoughts of the most acclaimed Italian and international designers and architects. A constant, ongoing exchange, to generate unique, functional and decorative designs.

**Kartell 2021.** A product catalogue that is also Kartell's road map towards 2030. Our road map is lined up along the progressive elaboration of projects and products. The ongoing pursuit of innovation, whether this concerns a material, a production process, a way of designing, remains our number one goal, to be achieved in a sustainable manner across the entire direct and indirect supply chain.

**What is a road map?** It is a path towards the future, which pools together the experience of one year, 2020, during which the way of life changed all over the world, but not our way of being. Our company continues to evolve, thanks also to the experience of these last few months, turning them into an opportunity to offer bespoke services and an extensive range of products which all feature a strong identity and style. When devising the means of communication for the product offering, special combinations were created between the icons, which had been restyled in a contemporary style, and the latest-generation products, forming a smooth dialogue that represents different lifestyles enclosed in a single cultural matrix. What emerges first and foremost is the culture of the product, made with painstaking care for details and innovative uniqueness. By combining the many articles which now make up the catalogue, the resulting image is refined and far from ordinary, starting with the colour, which moves away from bright hues, shifting towards paler yet loaded and highly distinguishing shades; many glossy colours are now matt and soft-touch, to generate a contemporary image which is easier to incorporate into settings with different elegant stylistic features.

The new catalogue is the expression of a well-organised planning of the brand's commercial and communication strategies, which are increasingly client-centric, designing emotion-packed stores where the purchase becomes an entire experience, the products arranged on the ground to match well-suited surroundings can be tried like garments, better to understand their functionality and purpose. Chairs matched with tables, sofas placed beside armchairs and T-tables, accessories and tableware teamed with decorative lights.

We are committed, and will continue to be, to complete the project concerning recycled and organic materials, which we use to make new products and restyled iconic products.

We have approached wood with a 3D processing technique and using minimum quantities of material, and we have extended the collection, inserting new objects which complete the lifestyle offering.

After stamping our strongest identity with the seal of transparency, we decided to go with the flow of changes and new trends, investing in a new, unprecedented material, which has the same visual and structural characteristics as polycarbonate, yet which allows us to achieve transparency with a material partly derived from vegetable waste.

As for the contract world, we have taken steps to accommodate the requests of architects and specifiers, who were demanding customisation, technical characteristics and product certifications, while choosing Kartell for the brand's graphic design that is based on the stylistic appeal of each designer, combined with industrial production.

**Where are we headed?** The road map we are embarking upon focuses on the issue of sustainability, under the banner of Kartell loves the planet, which constitutes the very essence of the brand's development plan.

We have been committed to following the guidelines of the plan outlined in the Agenda 2030 for Sustainable Development approved by the UN General Assembly, to benefit people and the planet.

Thanks to ongoing everyday actions and concrete organisational plans, we believe we can achieve the goals over the next few years and by 2021 convert the majority of our catalogue with green materials, and use as much recycled and recyclable material packaging as possible.

Our plan thus leads us to create emotions with our products, intended as items which provide a sense of well-being and at the same time create solid industrial projects which help build a better world.

The surfaces take on a delightful lightness to the touch, lending the product a textured elegance. The matt finish joins and supplements the glossy finish which has distinguished symbolic objects for many years and conveys a novel elegance, based on a strong personality and identity.

The colour palette is adjusted with neutral hues alternating with charged tones that blend in with the colour charts of a timeless prêt-à-porter wardrobe.

# smart wood

# smart wood

The wood collection expands its horizons and invades new worlds, such as the office and the home office. The technology that supports the development of Kartell's wooden line is applied to new types of products, to create a genuine family with different dimensions and new functions, which share not only the stylistic silhouette but also the use of a production technique based on the use of a minimal quantity of wood sourced from FSC® certified forests and processed with the utmost curvature possible and the three-dimensional characteristic feature that has distinguished the project from the onset.

recyclable transparency

# re-transparency

At the start it was transparency, and polycarbonate changed the idea of interiors from the year 2000. Today, the material which has been an identifying feature of the brand for years, has been restyled without changing. In the road map of industrial strategy that looks at the environment and at sustainability with a well-articulated action plan, Kartell has reinvented transparency, retaining the same aesthetic characteristics yet using a new textured component partly derived from vegetable waste. This brings the circular economy process which was launched with recycling and organic products to a close.

# trend & pattern

# trend&pattern

The now well-articulated offering of soft furnishings allows Kartell to work on an extensive range of upholstery covers which become the star players of the project itself. Marble finishes with vein patterns and special colours, supplement the chapter dedicated to tables, which are completed with ceramics processed with marble-vein effects in the pale and dark version. It is important to emphasise how the ceramic production process is certified green, included in the circular economy process. Kartell's industrial production also makes it possible - thanks to a special intervention on the moulds - to create textures replicating the designer's graphic mark on certain products.

# small office

# smart office

Even though the office these days isn't an actual place, unconventional and far removed from a traditional space marked by a desk beside a drawer unit and a table lamp, the Kartell office is suitable for any setting, whether at home, in a bedroom, in an innovative open-plan environment or a traditional workplace. The catalogue has been supplemented with the new desks and the bookcase from the Smart Wood collection, with a Q/Wood armchair with a base on castors, while at the same time the Maui seat dons new fabrics and new colours to celebrate the hundredth anniversary of the birth of its designer Vico Magistretti.

# precious

The metallic finish achieved through a sophisticated industrial process is another great innovation which Kartell has introduced into furniture and which continues to represent an aspect of the catalogue which is highly appreciated for specific decorative functions.

Two special new products have been added to the precious family. The gold finish of TOY and the bronze and titanium finish of A.I., one of the most recent seats made in recycled material and now available in a metallic version which enhances the appeal of its design.

# HOW TO READ THE DATA SHEETS

## GENERAL INFORMATION

A leading design brand, Kartell has for over 70 years been a creative laboratory of ideas and design working according to a logic of innovation and industrial production. In parallel, the brand pursues creativity with impossible challenges that have never been overcome before, proposing a unique and unprecedented offering that guarantees quality and maximum styling appeal for customers on a broad range of products made with trailblazing production technologies and novel, innovative materials. Continuous attention to quality also includes a focus on environmental sustainability both during production and in the management of the product itself. This publication contains technical information and advice for use that we hope our customers will find helpful.

The Kartell Catalogue is divided into 10 main chapters: Within each main chapter, the products are grouped by family, where this has not been possible, by type of product. Each product and product declination is immediately recognisable by the accompanying photograph and technical drawings. All products are therefore easy to find without the need for specific knowledge of the Kartell collection.

The Kartell Catalogue is divided into 10 main chapters:

**SEATING**  
**SOFAS AND ARMCHAIRS**  
**TABLES**  
**LIGHTS**  
**ACCESSORIES**  
**KIDS**  
**TABLEWARE**  
**FABRICS**  
**STONEWARE WITH MARBLE FINISH**  
**BOOKS**

Within each main chapter, the products are grouped by family, where this has not been possible, by type of product. Each product and product declination is immediately recognisable by the accompanying photograph and technical drawings. All products are therefore easy to find without the need for specific knowledge of the Kartell collection.

N.B. The company reserves the right to make changes to the technical characteristics of the products in the catalogue, without notice. Any new product or variation to the technical characteristics of the products will be made known to the public via the most effective methods.

Kartell App

Kartell App is the application for iOS and Android from which it is possible, in countries where the app is available, to access more extensive content and information related to the price list itself, product videos, top editorials and news.

## HOW TO READ AND USE THE PRICE LIST

The pages are organised vertically for each family of products, simply scroll down to read the technical information for each one. Specifically, you will find the following information for each product:

### (A) PRICES

The prices shown in the following price list apply from 1st February 2021 and are valid for 12 months, subject to Kartell's right to revise the same following prior notification. All prices are shown in the reference country currency. For each individual item, the price including VAT will be shown, with the price excluding VAT indicated below. VAT is calculated in compliance with the law in force when the price list is printed. Prices are always per unit. Exceptions to this rule are countries in which dual pricing has not been specifically set out, and therefore only the net price is indicated.

### (B) CODE

This is the number which accompanies each product or individual component, and must be indicated on every order. It is located next to the technical drawing or finish.

### (C) DIMENSIONS

The maximum dimensions are indicated in order to provide all of the necessary elements to assess the space occupied by the product. Depending on the country of reference, the units of measurement are cm or inches.

### (D) WEIGHT

The net weight of the product is stated, as this is a useful piece of information for products such as tables and chairs, to evaluate the suitability of the product for a specific use (e.g. for use in public spaces). Depending on the country of reference, the units of measurement are kg or pounds.

### (E) DESCRIPTION AND MATERIALS

This section contains details of the materials and any essential technical and functional aspects.

### (F) COLOUR SAMPLES

Details of the colours or colour combinations available. The full-colour guide symbol identifies the colours available to be freely combined, the two-way guide symbol identifies the fixed seat/colour pairing that cannot be changed. The colours shown are as close as possible to the actual product shade. However they are to be considered as general indications for consultation.

### (G) SYMBOLS

	INDICATES THAT THE CHAIR IN QUESTION IS STACKABLE AND SPECIFIES THE MAXIMUM NUMBER OF UNITS ALLOWED
	INDICATES THAT THE PRODUCT IS SUITABLE FOR OUTDOOR USE
	INDICATES THAT THE PRODUCT IS CUSTOMIZABLE
	PRODUCT IS DISHWASHER SAFE
	PRODUCT IS SUITABLE FOR FOOD CONTACT
	PRODUCT IS NOT SUITABLE FOR MICROWAVE USE
	PRODUCT IS SUITABLE FOR INDOOR USE
	PRODUCT IS NOT SUITABLE FOR CHILDREN AGED UNDER 18 MONTHS
	PRODUCT IS NOT SUITABLE FOR CHILDREN AGED UNDER 3 YEARS
	PRODUCT MADE OF RECYCLED MATERIAL
	PRODUCT MADE OF POLYCARBONATE 2.0 FROM RENEWABLE RAW MATERIAL
	PRODUCT MADE OF BIOPOLYMER CREATED USING RAW MATERIALS FROM RENEWABLE SOURCES OF NON-GMO AGRICULTURAL ORIGIN

## SYMBOLS AND SPECIFICATIONS ASSOCIATED WITH INDIVIDUAL LIGHTS

	INSULATION CLASSES	CL. I	CL. II	CL. III
	INDICATES THE LEVEL OF PROTECTION AGAINST ELECTRIC SHOCK. IN THE CASE OF CLASS II, INSULATION IS "REINFORCED" AND THE APPLIANCE'S EARTHING DEVICES ARE NOT REQUIRED.	INDICATES THE LEVEL OF PROTECTION AGAINST ELECTRIC SHOCK. IN THE CASE OF CLASS II, INSULATION IS "REINFORCED" AND THE APPLIANCE'S EARTHING DEVICES ARE NOT REQUIRED.	INDICATES A DEVICE IN WHICH THE PROTECTION AGAINST ELECTRIC SHOCK IS BASED ON THE EXTRA LOW VOLTAGE SAFETY POWER SUPPLY AND IN WHICH NO HIGHER VOLTAGES ARE PRODUCED.	INDICATES THE TYPE OF SURFACE ON WHICH THE APPLIANCE CAN BE MOUNTED. THE SYMBOL "F" INDICATES THAT THE APPLIANCE CAN BE MOUNTED DIRECTLY ON NORMALLY INFLAMMABLE SURFACES.
	DIRECT MOUNTING	IP20		INDICATES THE DEGREE OF PROTECTION AGAINST THE PENETRATION OF DUST, SOLID BODIES AND MOISTURE. IP20 RATING REFERS TO ORDINARY APPLIANCES THAT HAVE NO SPECIFIC REQUIREMENTS.
	PROTECTION RATING	IP20		ATTACHMENT INDICATES THE LAMP HOLDER ATTACHMENT TYPE ON THE APPLIANCE.
	VOLTAGE	INDICATES THE APPLIANCE POWER SUPPLY VOLTAGE.		MAX POWER INDICATES THE MAXIMUM POWER OF THE BULB THAT CAN BE CONNECTED TO THE APPLIANCE WITHOUT COMPROMISING ITS SAFETY.

### (H) CERTIFICATIONS

Reliability test information. More information is available in the "CERTIFICATIONS: Reference legislation" section

### (I) INFORMATION REGARDING PACKAGING UNITS

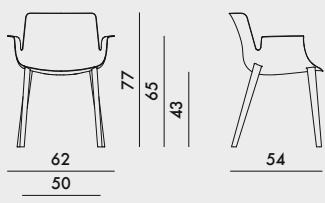

At the bottom of the page, you will see the following information indicated for each package in the order: the number of pieces, weight, volume and dimensions in cm or inches, depending on the reference country. The pieces within a package cannot be purchased separately.

# CUSTOMER FABRIC

## CUSTOMER FABRIC

### COM (CUSTOMER OWN MATERIAL)

The amount of fabric indicated for each model refers only to plain, self-coloured material in 140 cm width, without any defects.

The minimum order amount for this programme is as follows:

- 1 piece for sofas and armchairs;
- 4 pieces for chairs.

The feasibility of covering the requested product with COM is subject to verification by Kartell SpA of a sample of fabric to be sent together with the order.

Simply send a COM sample no smaller than A4 size (210 x 297 mm).

The use of any material that is not 140 cm wide, or of any fabric that is not plain and self-coloured, is subject to authorisation by Kartell Spa and in such cases the company may request a larger quantity than that indicated on the list.

The client must clearly indicate any particular cuts to be made, plus the direction of stripes or decorative parts.

Kartell Spa approval of the material provided by the Client is limited only to the production of the upholstery. Kartell SpA therefore declines any responsibility relating to resistance to wear, fire resistance or other technical characteristics of fabrics provided by the Client.

Kartell S.p.A. is in no way responsible for customer-supplied materials, for any defects or technical shortcomings of such materials, for any possible defective reactions on the upholstered product or for care and washing instructions.

### SHIPPING OF CUSTOMER OWN MATERIAL

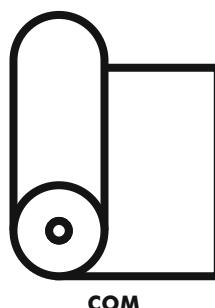

The sample of customer own material ("COM") and the fabric required for the production of the items ordered must be sent to us with delivery duty paid (DDP) complete with all the instructions required to identify the material, the order and the model it refers to.

The material should be sent to the following address: Kartell S.P.A., Via Delle Industrie, 1 – 20082 Noviglio (Milan)

### DELIVERY TIMES FOR CUSTOMER OWN MATERIAL ORDERS

Orders are generally available within 4 weeks of receipt of the material, unless otherwise indicated due to the particular characteristics of the fabric and, in any case, subject to technical feasibility.

**IMPORTANT:** indications regarding amounts of material required are not valid for customer own leather ("COL"). For further information, please contact our Sales Office.

Kartell has decided to include the innovative Aquaclean® fabric, which can be cleaned with water and contains no PFC, a substance contained in most stain-resistant fabrics which pollutes the environment and is harmful to health.

This ecological fabric has a structure designed to simplify cleaning and strength, reducing the risk of accidental tearing sometimes caused by our pets. It is also subject to Safe Front treatment, which prevents the proliferation of bacteria and dust mites.

# KARTELL BOOKS

## Kartell - The Culture of Plastics

**"Kartell - The Culture of Plastics"** is the first monograph on the Kartell design brand. Published by Taschen and available in six languages in two volumes (the first includes Italian, Spanish and Portuguese and the second includes English, French and German), the monograph is a chronological excursus through the technological, aesthetic and functional innovations and the activities of the Italian company, world leader in the industrial manufacture of design products made of plastic materials now in its third generation.

Narrating the tale in this coffee table book divided into decades from the '50s through to the new millennium are Silvana Annicchiarico, Gillo Dorfles, Chantal Hamaide, Marie-Laure Jousset, R. Craig Miller, Giovanni Odoni, Franca Sozzani and Deyan Sudjic while journalists Giulia Crivelli and Giovanni Odoni interview the current president, Claudio Luti, who in 1988 took over the management of the company from his father-in-law, Giulio Castelli.

A design industry of global fame synonymous with the concept of "transparency" in 400

pages full of images describes its earliest stages, its evolution, the challenges successfully met, its incessant drive in research and technological innovation, its designers, the prizes won and its worldwide distribution.

But Kartell expresses itself best through its product icons that can be found in homes all over the world. There are historic shots and pictures from the archives, announcements and visuals, with detailed captions on technological innovations revealing the history of a company that has taught us to appreciate the culture of plastics.

## kARTell - 150 items, 150 artworks

### **kARTell - 150 items, 150 artworks.**

Not only a book photographs taken by the most relevant photographers and contemporary artists world-wide, such as Mario Testino, Peter Lindbergh, Helmut Newton, Steven Meisel, David LaChapelle. With absolute freedom, every artist chose a Kartell product, within the items from the historical until the current collection, in order to give birth to his personal interpretation. In addition to images, a rich collection of stories written by famous people within different fields (cinema, music, art, show business).

A gift idea for design connoisseurs as well as for fashion, visual arts and photography lovers.

# USE AND MAINTENANCE

Simple care is needed for the maintenance of Kartell products to retain the original features of the materials.

## PLASTIC MATERIALS

**Cleaning.** Use a soft damp cloth with soap or a liquid detergent, preferably diluted with water. The use of the following substances must absolutely be avoided: acetone, trichloroethylene, ethyl alcohol or detergents containing even small quantities of these substances which cause irreparable damage to the plastic of which the products are made.

We recommend always using a damp cloth to prevent plastic surfaces from becoming charged with static electricity which attracts dust. Also avoid abrasive solvents, cleaning powders and creams, steel wool or rough sponge cloths.

**Use.** Do not drag objects across the plastic surface, even if it has a scratch resistant finish, since sharp objects can damage the plastic just as they would damage wood or metal. Do not place very hot plates or pots directly on the surface, but always use a cloth or trivet.

## WOOD

**Cleaning.** As with plastic surfaces, use a soft damp cloth. Do not use alcohol or other spot-removers. For a deeper cleaning use a little non-abrasive liquid detergent and wipe in the direction of the wood grain. Dry the surface well with a soft cloth. Never use acetone, trichloroethylene or ammonia.

**Use.** Moisture in wood can cause swelling which is normal in a natural material. Our woods hold up well under normal temperature and humidity conditions. Slight color variations from one piece of wood to another are normal and these tend to disappear with time. Wood can change color over time. To delay this, it is best to avoid placing it in direct sunlight.

## METALS

**Cleaning.** Normal dirt on either painted or plain metallic steel or aluminium surfaces must be removed with soap and water (preferably hot) and neutral liquid detergent; dry with a soft cloth or with a chamois cloth. Never use cleaning powders, abrasive or steel wool pads, which can cause scratching, or liquid detergents that contain chlorine or its derivatives such as bleach or muriatic acid.

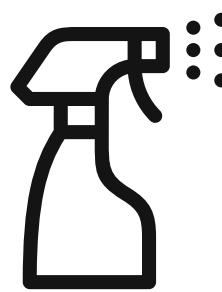

**Use.** Avoid spilling grapefruit juice, cola, salt and coffee on metal surfaces. These can cause indelible stains. To remove black marks on aluminium chair legs, products especially made for steel finishes or non-abrasive car polishes are recommended.

## FABRIC COVER

Kartell uses different kinds of covers, for each one you may find the appropriate cleaning and usage instructions within the instruction card enclosed in the packaging.

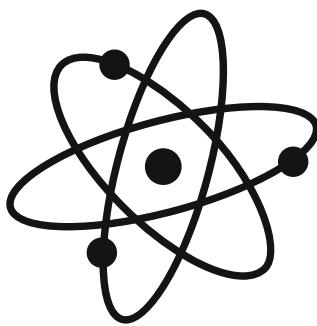

## STONEWARE

**Cleaning.** For routine surface cleaning, simply use a damp microfibre cloth. For more thorough periodical cleaning, use a neutral liquid detergent with a soft sponge or microfibre cloth.

product charts

# MATERIALS USED

## PLASTICS

Primary chemical and physical characteristics of the materials used in manufacturing Kartell products. Plastics are organic materials created by man. Their technological and physical characteristics are determined by polymers, in which one or more types of monomers are joined to form a molecule. Plastics can be divided into two major groups based on their chemical and technological performance: Thermoplastic and thermosetting. In recent years, technological research has made it possible to create increasingly sophisticated materials, whose performance and physical appearance are unlike that of what we generally consider as being "plastic". These types of plastic contain not only polymers, but also additives, fillers and reinforcements which give them better physical, chemical, mechanical or processability properties. These are called composite materials or technopolymers.

## THERMOPLASTICS

Thermoplastics are formed by resins which can be made more elastic through heating or harder through cooling. The temperature values depend on each individual resin. They are composed of numerous interwoven independent molecular chains. When heated, these chains slide, enabling the plastic to flow. When cooled, they become hard again. Many thermoplastics are used in the production of Kartell products, and are almost always mixed with other materials to enhance their performance, thereby becoming thermoplastic technopolymers. The main thermoplastics used are Polyolefins, the best known of which are PE (Polythene or Polyethylene) and PP (Polypropylene), ABS (Acrylonitrile, Butadiene, Styrene), PS (Polystyrene), PMMA (Polymethylmethacrylate), PA (Polyamide) and PC (polycarbonate). Their main characteristics:

### Polyolefins

Polypropylene and polyethylene are thermoplastic polymers belonging to the family of polyolefins: Polyolefins are high molecular weight hydrocarbons. They include low-density (LDPE), linear low-density (LLDPE) and high-density polyethylene (HDPE), polypropylene (PP) and polymethylpentene (PMP or TPX). Polyolefins are break-resistant, non-toxic and non-contaminating materials. These are the only plastics lighter than water. They easily withstand exposure to nearly all chemicals. They are easy to colour and modify to create specific alloys, using minerals like talc, as required for the product.

Polypropylene (PP) is lightweight, translucent and strong. It has excellent mechanical and chemical resistance (it has no known solvent at room temperature). It's weather resistant, so it can be used to create products for outdoor use. Thanks to its features and its warm and soft physical appearance, polypropylene is particularly

suitable for manufacturing chairs.

Polyethylene (PE) is a chemically inert plastic. It has no known solvent at room temperature; aggressive solvents will cause softening and swelling, but these effects are usually reversible.

### Acrylonitrile–butadiene–styrene (ABS)

ABS polymers are a single technopolymer family. The name comes from the first letter of the three monomers composing them:

- Acrylonitrile (A) provides thermal resistance to aging;
- Butadiene (B) helps maintain properties at low temperatures, technical resistance, and impact resistance;
- Styrene (S) gives shine, solidity and ease of processing.

By varying the proportions of the three components, a wide variety of types of ABS can be created for a wide variety of uses: in the automobile sector, office equipment, electrical and electronic products, appliances, and naturally, furniture. ABS are resistant to high temperatures, chemical compounds and ageing, and are solid and impact resistant. They can be given high, medium and low (matte) gloss surface finishes and are easy to colour. However, some types of ABS are sensitive to certain chemical compounds and solvents. Therefore, the anti-cracking properties need to be assessed for each application. ABS aren't generally weather resistant. If the material is not protected, it may fade and become brittle. They are used for most traditional Kartell articles, such as round and square elements and modular bookshelves.

### Polystyrene (PS)

PS is the result of styrene polymerization. It is a rigid and non-toxic polymer with excellent dimensional stability and good chemical resistance to water-based solutions but limited resistance to solvents. It is ideal for products such as waste baskets and office articles. It is used in its so-called "aesthetic" version for its good surface appearance. It is also used as HIPS (scratch-resistant polystyrene), with added rubber to make it scratch resistant.

### Polymethylmethacrylate (PMMA)

Polymethylmethacrylate has high aesthetic and functional qualities. It is transparent, solid and weather resistant. Acrylic resins are used to make all transparent products, including in the furniture sector. So-called "plastic rubbers" can be added to improve their resistance properties, making it impact resistant. Antonio Citterio's Mobil drawers are made of this special combination.

### Polyamide Nylon Resins (PA6)

This is a group of linear polymers with repeated amide linkages along the back-bone. These are produced through the polymerization of amino acids. Nylon is strong and tough, abrasion, impact and wear resistant. Numerous fillers can be added to improve its features. It is used for clothes stand bases or Oxo trolley supporting frames, parts which support weights

### Polycarbonates (PC)

The term polycarbonate is used to identify a thermoplastic polymer. To manufacture an item using this material, the polycarbonate is melted and moulded under pressure so that it takes on the shape required.

Kartell's ongoing research into new proposals that are both innovative and technological

draws on its past as it looks to the future, facing increasingly daring challenges that involve some of the innovations that have revolutionised the history of design. Examples include polycarbonate, which gave birth to transparent design, and subsequently lots more ideas and products of outstanding beauty. The present is 2.0, a material that combines a second generation renewable polymer made from industrial cellulose and paper waste with an ISCC\* (International Sustainability and Carbon Certification) certified process.

The manufacture of polycarbonate items involves two main processes:

- Extrusion: here, the polymer is heated, then injected into a die with the shape of the final product. This process is used to manufacture pipes, sheets and profiles
- Injection moulding: here, the polymer in granular form is heated, injected into a mould, then cooled, giving it the shape of the final product. This is the most commonly used process for objects in a variety of sectors.

### The advantages of polycarbonate

Polycarbonate:

- has excellent mechanical, thermal and electrical properties
- has high resistance to fire and impacts, and high elasticity
- is easy to recycle and process

These characteristics make this material ideal for a variety of applications: from automobiles to packaging to appliances to consumer products. Kartell was a pioneer in the sector, demonstrating polycarbonate's many applications in the furniture sector as well.

### Polyvinyl Chloride (PVC)

PVC's structure is similar to polyethylene, but contains atoms of chlorine. The chlorine atom makes PVC vulnerable to some solvents but also more resistant in many applications (PVC has a considerable resistance to oils and a very low permeability to gases). Polyvinyl chloride is transparent with a slightly bluish tint, and can be coloured in a vast range of tones.

### Styrene Acrylonitrile (SAN)

Styrene Acrylonitrile belongs to the family of styrenes, and is one of the best in terms of mechanical characteristics. SAN is rigid and hard, either transparent or opaque. Pieces made using SAN have a high dimensional stability and can be "easily" injection moulded.

### THERMOSETTING PLASTICS

These resins can no longer return to their original state after they have been polymerized through heating or other means. Before transformation, thermosetting plastics also have a chain structure. During polymerisation, atomic cross links are created between molecules, forming a complex interlinked network. These atomic cross links prevent the plastic from sliding during subsequent heating processes. Excessive heat damages polymers. The thermosetting resins used in Kartell articles are: PUR (polyurethane), SMC (Sheet Moulding Compound), BMC (Bulk Moulding Compound) and melamine.

### Polyurethane (PUR)

Polyurethanes are formed by two components, polyol and isocyanate, which when combined in different types and percentages form countless materials with differing and contrasting characteristics: from soft polyurethane used by the foam industry to

the rigid structural variety, used to make the Battista trolley tops by Antonio Citterio.

### Melamine

Melamine resins—commonly called melamine—are thermosetting resins that are colourless and odourless, resistant to water, chemical agents, abrasion and heat, and are extremely transparent to light.

Melamine resins are used primarily for tableware (especially dishes), plastic laminates and kitchen accessories.

Melamine resin utensils and bowls are microwave safe, absorbing radiation and heat.

### SMC AND BMC

These are thermosetting resins that are mixed with thermoplastic resins and impregnated with fibreglass. The difference between the two resins comes from the method by which they are impregnated: in SMC the resin impregnates a sheet of fibreglass, while in BMC the moulding mass is impregnated with glass fibres. Fibreglass fill is used to create an especially resistant material, used in Philippe Starck's Miss Balù table tops.

### Fibreglass Reinforced Polyester (GRP)

GRP belongs to the family of thermosetting resins; it has high mechanical characteristics, so much so that it is also used in the automobile and electronics industries. Over time, two technologies have been developed allowing economical use of this material in mass-produced products: SMC (sheet moulding compound), where the resin impregnates a sheet of fibreglass and BMC (bulk moulding compound) where the resin impregnates disordered glass fibres. Thanks to these technologies and the material's high mechanical characteristics (up to ten times greater than thermoplastics), highly technological products can be produced that are capable of replacing sheets and die-casting in many cases.

### WOOD

Natural wood is taken from the plant, either deciduous or evergreen, and is classified commercially as hardwood or softwood. Kartell uses some of the best wood available on the market. It is processed to guarantee long wear and resistance in addition to respect of all environmental standards. Since wood is a natural material, there can be colour variations from piece to piece. The plastic laminate that is sometimes combined with wood is created through lamination and is composed of phenolic and melamine plastic resins and thermosetting polymers. It is used in the furniture manufacturing sector as a coating for chipboard, MDF, honeycomb and other wooden panels.

### METALS AND PAINTS

In Kartell products, metals are limited mainly to structural parts or to emphasize particular aesthetic details. The technologies used are extrusion and die-casting. Often, to improve the surface and aesthetic quality, metal parts are painted: in this case using powder coatings are used, which can be electrically charged to adhere perfectly to the metal surface. The paints used for metal are usually epoxy polyesters. Thanks to their greater durability and resistance to light, abrasion and weather, the products made using these materials can be used outdoors. Die casting is used primarily to solve certain complex aesthetic issues, such as for the legs of the Battista and Gastone carts designed by Antonio Citterio. The die-cast parts can be

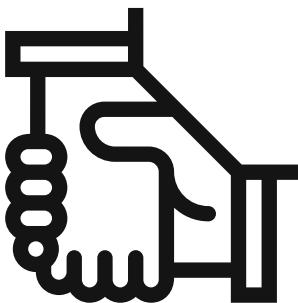

used as is or coated with epoxy-polyester.

On many plastic products or parts of products, more traditional paints, such as acrylic or polyurethanes are used. In this case painting serves to enhance the aesthetic quality of the surface finish and improve durability.

### STONEWARE

The surface finish is obtained using a natural blend of ceramic clays and mineral colours. This produces a porcelain stoneware which is unalterable over time, resistant to high temperatures and atmospheric stress, scratch-resistant, completely waterproof and stain-resistant, UV-resistant, hygienic and easy to clean. In the production of this material, clays ensure plasticity and workability; feldspars ensure vitrification and mechanical resistance; sand and quartz ensure dimensional stability and mechanical resistance; kaolin and carbonates ensure colour saturation and fusibility; colour pigments ensure even colouring of the mix.

# GENERAL TERMS AND CONDITIONS OF SALE

## I. SCOPE

1. These General Terms and Conditions govern sales contracts entered into by Kartell S.p.A. ("Kartell") and its clients, professionals that purchase and resell ("Client") the Goods presented in the Kartell catalogue ("Goods"). The General Terms and Conditions of Sale may be waived or modified only through a written agreement between Kartell and the Client.

## II. ORDERS

1. Each Product order constitutes an irrevocable offer by the Client. Kartell reserves the right at its sole discretion, to accept, modify or refuse orders at its sole discretion, or to suspend delivery should the Client not provide Kartell with guarantees for the request and not respect the sales guidelines issued by Kartell from time to time.
2. Excluding purchases made for specific purposes agreed in advance with Kartell or in the "contract" channel, the Goods may only be resold retail at the sales point indicated to Kartell.

## III. PRICE

1. Unless otherwise agreed, the prices of the Goods indicated in the price list are ex works for deliveries within the European Union, and ex Kartell warehouse for deliveries outside the European Union.
2. The minimum amount of each order for delivery inside Italy is €400.00 (four hundred euros) excluding VAT, and €500.00 (five hundred euros) excluding VAT within the European Union. Should the order not reach this amount, the order may be accepted with a minimum additional charge on the Client invoice of €25.00 (twenty-five euros) in the first case, and €40.00 (forty euros) in the second case as a "partial contribution to expenses".
3. The price applied to the Goods is that in force at the order date. VAT must be added to the prices indicated in the price list (minus any discounts) in accordance with the law.

## IV. OWNERSHIP

1. Pursuant to Articles 1523-1526 of the Italian Civil Code, ownership of the Goods will be transferred to the Client only upon full payment of the price. In the event of hire purchase and Client default, Kartell shall retain any instalments already paid by way of compensation, without prejudice to claims for greater damages.

## V. PAYMENTS

1. Payment is considered to have been made only when Kartell is in possession of the amount. In the event of payment by cheque or other method, the payment method must

be considered to be accepted subject to payment in due course.

2. However, order payment may not be suspended or delayed due to Client claims or defences regardless of ownership, nor may the Client offset debits and credits with Kartell.
3. In accordance with Article 1186 of the Italian Civil Code, failure to pay or partial payment of any amount owed to Kartell shall automatically place the Client in default with the resulting expiry of the time limit and Kartell's simultaneous right to suspend deliveries, refuse or cancel orders, modify sales conditions and take action to ensure full payment of the credit, in addition to expenses, interests and damages. Late payment will also result in the automatic application (with no prior notice) of late interest at the rate established by Article 5 of Legislative Decree 231/2002.

## VI. DELIVERY

1. The delivery date is purely approximate and non-binding, with Kartell being entitled to make partial deliveries.
2. Should delivery be delayed as requested by the Client, Kartell reserves the right to charge monthly warehousing and/or handling expenses equal to 10% (ten percent) of the amount indicated on the invoice, beginning in the month following notice to the Client of the Goods' availability.
3. Any Product order cancellation or rejection at receipt will result in the application of a penalty on the Client of 30% (thirty percent) of the amount indicated on the invoice, without prejudice to claims for greater damages.
4. Should the Goods be shipped outside EU territory, the Client must provide Kartell all documents certifying Product delivery within one (1) month. Should the Client fail to do so, Kartell reserves the right to charge the Client all expenses incurred to complete the sale operation.
5. At delivery, the Client must carefully inspect the quantity and condition of Product packaging. On pain of forfeiture, any obvious defect must be: (i) reported in writing to the shipper at the time of delivery, indicating expressly on the consignment note "conditional acceptance", and (ii) promptly reported in writing to Kartell within 48 (forty-eight) hours of delivery, in compliance with the instructions below.
6. Any returns must be approved in writing in advance by Kartell: unauthorised returns will be returned to the sender along with delivery charges.

## VII. GUARANTEE AND CLAIMS

1. The legal guarantee for the Goods begins, as per Article 1495 of the Italian Civil Code, on the date of acceptance of Product delivery by the Client or its representatives.
2. Any claim regarding the Goods (excluding those identified at the time of receipt and regarding shipping) must be made in writing to Kartell **within 8 (eight) days** of the discovery, and in any case **within 12 (twelve) months** of Product delivery acceptance by the Client or its representatives in compliance with the following procedure: [Par. 6. Claims]
3. With reference to the Consumer Code, Legislative Decree 206 of 6 September 2005, Articles 131 and 132, the Client loses and forfeits any right of recourse against Kartell if it does not notify Kartell in writing of an

end-customer claim within 8 (eight) days of receipt of the end customer's complaint using the procedure described above.

4. Kartell shall not be liable for damages caused by improper use, tampering, normal wear or failure to respect the assembly and maintenance instructions included in the product card, or component modifications or replacements with others not in accordance with the original specifications.
5. In any case, Kartell's liability is limited to the value of the defective goods: Therefore, Kartell may not be held liable, among other things, for expenses sustained by the Client or end customer or for any other damage claimed (direct or indirect).
6. **The bulbs contained in the packaging of each lamp are supplied by Kartell as a courtesy in order to provide the best service to our customers.** However, since these accessories are not directly manufactured by Kartell but supplied by external suppliers, Kartell does not guarantee their correct function. In case of bulb fault or failure, it is the customer's responsibility to replace the bulb, in compliance with the technical information in the catalogue, in the dedicated section, or in the instruction booklet enclosed with the product, to which reference is made in full, and for which Kartell assumes no liability.

## VIII. COMPETENT COURT

1. Any disputes arising directly or indirectly from the contractual relationship are the exclusive competence of the Milan court.
2. Applicable law is substantially Italian (excluding any application of foreign laws).

# CLAIMS

## CLAIMS FOR SHIPPING DAMAGE

Should one of the following situations be noted at the time of Product delivery

- a) merchandise missing with respect to accompanying document
- b) merchandise different with respect to accompanying document
- c) Damaged packaging, highlighted by the relevant impact indicator where it is affixed to the packaging;

### **the Client must**

1. write reservations on the consignment note (either on the carrier's copy or on the recipient's copy). Written reservations must be detailed, as general reservations are not sufficient to allow proper processing of the claim
2. Complete the reporting form ( Transport claim form ) in full: the form (facsimile shown below) is available from Kartell's regional agent, or Kartell's Sales Office at [transport@kartell.it](mailto:transport@kartell.it);
3. Send a copy of the consignment note and the reporting form within 48 (forty-eight) hours of Product receipt.

## CLAIMS FOR PRODUCT NON-CONFORMITY

To notify Kartell of a claim in the event of Product non-compliance, send the following documents to the Kartell Customer Care Office at [quality@kartell.it](mailto:quality@kartell.it):

1. The product non-compliance form ( Generic claim form ) completed in full. the form (facsimile shown below) is available from the Kartell Customer Care Office, at the e-mail address above, or from Kartell's regional agent;
2. Photographs showing the non-compliance (at least one photo per non-compliant Product)

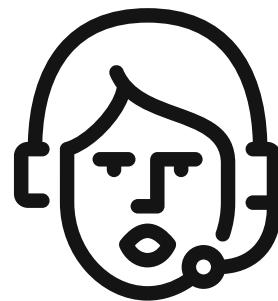

If the complaint concerns a new product - just received by the customer or just delivered by the customer to the end customer - you must also send images of the relative packaging (full view and close up of the double label (production and shipping), as shown below.

You should keep hold of the Quality Control slip found inside the Product information, because it contains information which may be required by the Kartell Customer Care Department to make any required checks on production batches potentially affected by non-conformity. **Please also retain the original product packaging.**

Only reports sent to the aforementioned addresses along with all the required elements will be taken into consideration by Kartell.

In the absence of any or all of the required documentation and/or the original packaging, or in the case of failure to follow the procedure set out above, Kartell will be unable to follow up your report.

If it is possible to use the WebUP system, the complaint can be registered in the system using the same procedure.

# LIGHTING REGULATIONS **CERTIFICATIONS**

## REFERENCE MARKS

**CE** – indicates the conformity of the products bearing the acronym with the essential requisites of European Community directives.

**ENEC** – the European trademark for high quality in electrical products which indicates conformity with current European regulations is recognised as the equivalent of the individual national trademarks in 20 European countries, signatories to the Lum Agreement.

**ETL** – American and Canadian trademark of quality for electrical products. It certifies product conformity with current American and Canadian regulations.

**PSE** – Japanese trademark of quality for electrical products. It certifies product conformity with current Japanese regulations.

**NOM** - Mexican trademark of quality for electrical products. It certifies product conformity with current Mexican regulations.

**EK/KC** - Korean trademark of quality for electrical products. It certifies product conformity with current Korean regulations..

## **CB Certificate (Australia and New Zealand)**

Certification attesting product conformity with international IEC regulations, can be issued with specific national deviations.

**CB Certificate** – Certification attesting product conformity with international IEC regulations.

**CCC** - China Compulsory Certificate The brand certifies product compliance with Chinese standards and is mandatory for lighting products imported in China.

## ECO–CONTRIBUTION

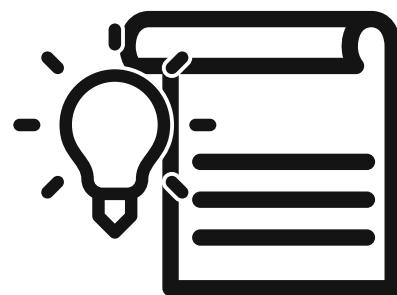

Introduced in Legislative Decree no. 151 dated 25 July 2005 (updating directives 2002/95/EC, 2002/96/EC and 2003/108/EC), the eco-contribution is an environmental charge used to pay for waste management of electrical and electronic equipment (WEEE). This charge is used to finance all phases of treatment, transport, recovery and disposal of electrical and electronic appliances. Kartell lighting prices include the WEEE.

## NOTICE PURSUANT TO ARTICLE 13 OF LEGISLATIVE DECREE NO. 151 DATED 25 JULY 2005.

Directive 2012/19/UE (waste electrical and electronic equipment: WEEE):

User information: pursuant to article 13 of Legislative Decree no. 151 dated 25 July 2005, no. 151 "Updating of Directives 2002/95/EC, 2002/96/EC and 2003/108/EC, regarding the reduction in the use of dangerous substances in electrical and electronic equipment, and the disposal of waste" this product is conform.

The barred bin symbol on the equipment or their packaging indicates that at the end of its useful life, the product must be disposed of separately from other waste. The user must take the equipment to an authorised recycling centre for electronic and electric waste, or return it to the original vendor when purchasing an equivalent product, on a one-to-one basis. The appropriate collection for environmentally-compatible recycling, treatment and disposal contributes to avoiding possible negative effects on the environment and its health and encourages the reuse and/or recycling of the materials used in the equipment. Improper disposal of the product by the user will result in the application of the administrative sanctions stipulated by regulations in force.

# CERTIFICATIONS ISO 9001:2015

cation Network), a supranational body which guarantees mutual recognition of the ISO standard in countries worldwide.

The attainment and maintenance of this certification, made possible by the commitment and perseverance of all company offices involved, testifies to the continued research into ever higher levels of quality in company management systems.

A copy of the Quality Certification is available for downloading on [www.kartell.com](http://www.kartell.com)

## COMPANY QUALITY CERTIFICATION: ISO 9001

In 1996, Kartell decided to certify its Corporate Quality Management System in compliance with UNI EN ISO 9001:1994 standards.

In 2005, the company aligned its Quality Management Systems with the standard UNI EN ISO 9001: 2000.

In 2008, the company renewed its ISO 9001:2000 certification.

And, in 2010, it switched to UNI EN ISO 9001:2008.

During 2017 Kartell updated its certification standard to UNI EN 9001:2015.

A guarantor for this certification process is the I.I.P. (Italian Institute of Plastics), which is itself accredited by SINCERT and CISQ, the Italian federation of accreditation bodies for Quality Management Systems.

CISQ is part of IQNet (International Certifi-

# ISO 14001:2015 CERTIFICATIONS

## RECYCLABILITY

Recyclability, sustainability, eco-compatibility - in two words environmental friendliness - are the issues at the heart of Kartell's product development strategy.

As regards recyclability, the eco-friendly focus begins as early as the planning design and production phase: to simplify recycling, the various components of Kartell products are easy to disassemble and separate into single-materials parts; furthermore, all plastic components are clearly marked as such in compliance with DIN 6120 part 2, to ensure that they can be easily identified and recycled.

## PACKAGING

All product packaging (paper, cardboard and plastic wrap) is 100% recyclable according to local recycling practices.

Contributing to environmental sustainability means avoiding waste and improper waste disposal.

For more information on the recyclability of each product, please visit [www.kartell.com](http://www.kartell.com)

## DIN 6120 PART 2 RECYCLING SYMBOLS

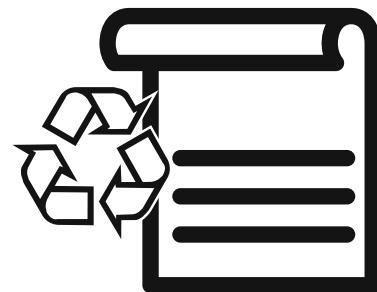

The code within the logo identifies the compound in accordance with the following table:

01	02	03	04	05	06	07
PET	PE-HD	PVC	PE-LD	PP	PS	O

## ISO 14001 CERTIFICATION: 2004

In 2011 Kartell achieved UNI EN ISO 14001:2004 certification for its support of an effective Environmental Management System, an international standard recognised throughout the world and developed about 10 years ago which defines development and implementation parameters in corporate processes in order to achieve an effective environmental management system.

## WHAT IS ISO 14001?

This certification attests that the organization certified has implemented a management system capable of controlling environmental impact in its own business and systematically endeavours to improve it in a sustainable, effective and consistent manner. ISO 14001 certification is not obligatory but is the result of the voluntary choice of the Company which decides to define, implement, maintain and improve its own environmental management system.

During 2017 Kartell updated its certification standard to UNI EN ISO 14001:2015.

A copy of the Quality Certification is available for downloading on [www.kartell.com](http://www.kartell.com)

## CERTIFICATION FSC™

### FSC® CERTIFICATION

Kartell has obtained FSC (Forest Stewardship Council™) certification for the Smart Wood collection.

The FSC™ mark identifies products made with wood sourced from forest managed in a responsible fashion, in line with rigorous environmental, social and economic criteria.

The forests are controlled and assessed independently in conformity with the standards (principles and criteria of best practice forest management) established and approved by the Forest Stewardship Council a.c. with the participation and consent of all stakeholders.

The wood comes entirely from FSC certified forests, thus guaranteeing the origin and correct exploitation of forest resources. Consumers are fully guaranteed about the origin of the materials purchased.

The FSC contribution is mainly aimed at promoting sustainable management of all types of forests, combating deforestation, restoring damaged forests and significantly increasing reforestation and the growth of woods everywhere.

Ask for FSC™ certified products

**FORESTS  
FOR ALL  
FOREVER**

## CERTIFICATION CARB

### CARB

In order to reduce the emissions from composite wood-based panels incorporated into the products used and intended for indoor living environments, all the items which contain wood-based panels are made using certified materials, conforming to the emission levels envisaged by the CARB (California Air Resource Board) and TSCA Title VI (Toxic Substances Control Act) standards.

All the Four tables, the Glossy tables (codes 4572, 4573, 4579, 4578, 4580, 4584) are CARB certified;

Glossy and Multiplo outdoor tables not subject to CARB

KartellLovesThePlanet

**KARTELL BIO**

Our ongoing research and innovation in industrial processes have enabled our design to be produced with a biopolymer made from renewable raw materials, derived from non-GMO agricultural waste not intended for the food chain.

The product contained in this packaging meets the sustainability requirements highlighted in the "Kartell loves the planet" manifesto and conforming with UN 2030 Agenda for Sustainable Development. The product has obtained international TÜV Austria certification with the maximum star rating and, as a designer product, will only gain value over time.

## CERTIFICATION GREENGUARD

### GREENGUARD

In its continuing commitment to protecting its customers' health, Kartell obtained Greenguard certification for its products in 2014.

When purchasing a Greenguard-certified product, consumers can be certain the product has been inspected, does not pollute and is not dangerous.

Greenguard is used by many certification processes for environmentally-sustainable buildings (LEED; CHPS; ASHRAE; Green Globes; NAHB; IgCC, CONSP) around the world.

### GREENGUARD: CERTIFIED CATEGORIES

All Kartell products that have received GREENGUARD certification are featured on the UL SPOT website.
