Leitbild – Vision / Our Guiding Light – Vision

Leuchtende Leidenschaft

ORION steht für Qualität, Eleganz und Nachhaltigkeit. Wir verbinden die Kreativität unserer Designer und die österreichische Handwerkskunst zu Produkten, die in der ganzen Welt Anerkennung finden.

Dabei sind uns nicht nur die besten Materialien und Techniken für unsere Produkte wichtig, sondern auch die Wertschätzung für unsere MitarbeiterInnen. Mit einem Exportanteil von 80 Prozent ist ORION international ausgerichtet und trägt als stabiles Unternehmen zur Sicherung österreichischer Arbeitsplätze bei.

Hochwertige Materialien, professionelle Verarbeitung, unsere spezielle Oberflächenveredelung und Langlebigkeit kennzeichnen unsere handgefertigten Originale. Mit Zertifikat.

Illuminating passion

ORION stands for quality, elegance and sustainability. We combine the inspiration of our designers with artisan Austrian craftsmanship to create products respected throughout the world.

For us, it is not just the best materials and production techniques that matter. But also, the sincere appreciation for our employees and their highly skilled craftsmanship. ORION has a strong international orientation with an export share of 80% – a solid business contributing to job security at our home base Austria.

High quality materials, professional workmanship, our unique surface finishing and durability – the hallmarks of our handcrafted Originals. Certified.

Auszeichnungen

Geprüfte Produktion
Wir garantieren gleichbleibend hohe Qualität unserer Produkte. Unser Qualitätsmanagementsystem ist TÜV-geprüft und wurde mit dem internationalen Zertifikat ISO 9001:2000 bestätigt.

Ausgezeichnete Leistungen
Im Jahr 2000 verlieh Bundesminister für Arbeit und Wirtschaft, Martin Bartenstein, die Berechtigung zur Führung des Österreichischen Staatswappens an ORION. Er ehrte damit die langjährigen Leistungen aller Familienmitglieder sowie der gesamten Belegschaft.

Staatliche Anerkennung für Ausbildungsplätze
Für jahrzehntelange Verdienste um die Ausbildung von Lehrlingen in den unterschiedlichsten Lehrberufen verlieh Bundesminister für Wirtschaft und Arbeit, Martin Bartenstein, ORION 2007 die Staatliche Auszeichnung gemäß § 30a Berufsausbildungsgesetz.

Awards

Certified production
We guarantee the consistent high quality of our products. Our quality management system is TÜV-certified and approved by the international certificate ISO 9001:2000.

Awards received
ORION was awarded the license to carry the coat of arms of Austria by the Federal Minister for Labor and Economy, Martin Bartenstein, in the year 2000. It honors the long-term achievements of all family members and employees.

National Award for Vocational Training
ORION received the National Award for decades of merit in vocational training programs from the Federal Minister for Labor and Economy, Martin Bartenstein, in the year 2007.

Firmengeschichte

Eine österreichische Erfolgsgeschichte

ORION Leuchten ist ein österreichisches Familienunternehmen in der dritten Generation. Seit der Gründung 1948 fertigt ORION hochwertige Luster und Leuchten für den Wohn- und Objektbereich. Heute beschäftigen wir über 250 MitarbeiterInnen und verfügen über ein weltweites Netzwerk an Händlern und Partnern.

1948: Gründung des Einzelhandelunternehmens „Rudolf Molecz, Handelsvertretung Elektrowaren und -Material" in Wien Simmering. Ursprünglich als Elektroteilhandel konzipiert, beginnen die Mitarbeiter bald, Leuchten in Handarbeit zu fertigen. Die Erzeugnisse erfreuen sich großer Beliebtheit und Rudolf Molecz erweitert die Produktion um kleinere Maschinen.

1953: Das Unternehmen übersiedelt nach Wien Favoriten. Um das wachsende Sortiment präsentieren zu können, werden nach kurzer Zeit Flächen für Schauräume zugekauft. Sohn Leopold steigt offiziell in das Geschäft ein und das Unternehmen wird in die „Rudolf Molecz & Sohn OHG" umgewandelt.

1959: Die Familie Molecz erwirbt die Gewerbeberechtigung zur fabrikmäßigen Erzeugung von Beleuchtungskörpern und errichtet in Wien-Oberlaa eine Fabrik. Weitere Leuchtenmodelle werden ins Programm genommen und Eigenentwicklungen patentrechtlich geschützt.

1969: Leopold Molecz etablierte in Wien-Neubau das „Leuchtenzentrum" – Europas größtes repräsentatives Leuchtenfachgeschäft mit 2000 m² Schaufläche.

1973: Die Leuchtenfabrik wird durch eine Galvanik-Abteilung erweitert. Oberflächen werden fortan durch eine eigens entwickelte Art veredelt und behalten ihren Glanz für lange Zeit. Handelsbeziehungen zum Ausland werden aufgebaut und es beginnt der florierende Export. Erste Messen führen nach Budapest und Moskau – viele weitere sollen folgen.

1975: Nach einer äußerst erfolgreichen Produktserie ändert die Familie den Firmennamen auf „ORION Leuchten" und trennt den Produktions- und Handelsbereich.

1976: Die Söhne Peter und Paul treten in das Unternehmen ein – 1982 folgt Sohn Michael. Zug um Zug werden ORION-Lichthäuser in Österreich eröffnet. Das Unternehmen etabliert sich zum Familienbetrieb.

1984: ORION Leuchten eröffnet das Zentrallager, dem auch die Exportabteilung angeschlossen ist. Peter Molecz übernimmt in leitender Funktion die Produktion, Michael den Einkauf und Paul den Export, der bereits weltweit ausgebaut ist.

1985: Der Exportbereich wird durch Projektarbeiten erweitert. In Zusammenarbeit mit Architekten realisiert ORION Sonderanfertigungen von Großleuchten sowie ganze Ausstattungen von Palästen und Hotelketten.

1990: Die ORION-Exportländer werden durch die jungen Demokratien der Reformstaaten in Mittel- und Osteuropa, Russland und die GUS-Region erweitert.

1994: Gründung der Niederlassungen in Budapest und 1997 in Prag.

2000: Martin Bartenstein, Bundesminister für Wirtschaft und Arbeit, verleiht ORION für Verdienste um die Wirtschaft des Landes das Österreichische Staatswappen und ehrt damit die Leistungen aller Familienmitglieder sowie der gesamten Belegschaft. Das Qualitätsmanagementsystem von ORION wird durch das internationale Zertifikat ISO 9001:2000 bestätigt.

2002: Eröffnung des Lichthauses ORION Licht Nord in Gerasdorf bei Wien.

2005: Gründung einer Niederlassung in Bratislava.

2006: Das Wirtschaftsministerium würdigte das Familienunternehmen mit der Auszeichnung als hervorragender Ausbildungsbetrieb; seit 1950 hatten hunderte Jugendliche bei ORION erfolgreich Ihre Lehre absolviert. In demselben Jahr tritt die nun bereits vierte Familiengeneration – Florian und Bastian Molecz – in das Unternehmen ein.

2009: Eröffnung eines neuen Lichthauses in Graz.

2011: Eröffnung eines zweiten Lichthauses in Prag Ruzyne.

2012: Im März 2012 bekommt Leopold Molecz aufgrund seiner außergewöhnlichen Leistungen für die österreichische Wirtschaft den Titel Kommerzialrat verliehen.

2014: Österreichische Handwerkskunst ist in Asien hoch in Mode: Ab 2014 gewinnen die fernostasiatischen Länder an Bedeutung in der Exportstruktur von Orion.

2015: Unternehmensübergabe an die 3. Generation: Peter, Paul und Michael Molecz, die seit 1987 in der Geschäftsleitung erfolgreich tätig sind.

Was 1948 mit einer Handelsvertretung begann, präsentiert sich heute als modernes, österreichisches Familienunternehmen, das mit weltweiter Anerkennung qualitativ hochwertige Leuchten aller Stilrichtungen produziert.

Orion's History

An Austrian success story

ORION Leuchten is a third-generation Austrian family business that has been producing high-quality chandeliers and lighting for residential and commercial properties since it was founded in 1948. Today we have over 250 employees and a global network of distributors and partners.

1948: Founding of retail business "Rudolf Molecz – Sales Agent Electronic Devices and Materials" in Vienna Simmering. Originally intended as an electronic parts retailer, the employees soon start manufacturing hand-crafted lighting. The products quickly are in high demand and Rudolf Molecz extends production to small machinery.

1953: The company moves to Vienna Favoriten. For presenting the growing product range, additional surfaces are acquired to build show rooms. Son Leopold officially joins the company which is re-named to "Rudolf Molecz & Sohn OHG".

1959: The Molecz family acquires the business license for industrial lighting production and builds a factory in Vienna-Oberlaa. The range of lighting models is extended and in-house developments are patented.

1969: Leopold Molecz establishes a showroom "Lighting Center" in Vienna Neubau – the largest, most distinguished lighting retailer at that time in Europe.

1973: The lighting factory is expanded by an electroplating department. Surfaces now receive a uniquely developed finishing that lets them retain their shine over a long period of time. Trade relations abroad are established and prosperous export begins. First trade fair visits lead to Budapest and Moscow – many more follow.

1975: In honor of a particularly successful product series the family changes the company name to "ORION Lighting", sub-dividing it into branches for production and retail.

1976: The third generation joins the company: first Leopold Molecz's sons Peter – followed by their brother Michael in 1982. Step by step ORION lighting showrooms are opened throughout Austria. (The company – in the true sense of the word – turns into a family business.)

1984: ORION Lighting opens its main distribution center with the export department attached to it. Peter Molecz takes on the management of production, Michael of purchasing and Paul of export, which has already expanded worldwide.

1985: Export is driven by taking on special projects. In cooperation with architects ORION develops and manufactures special orders for large scale lighting projects as well as complete lighting equipment for palaces and hotel chains.

1990: ORION extends its export countries to the new democracies in Central and Eastern Europe, Russia and the CIS-countries.

1994: Founding of branches in Budapest (Hungary) and 1997 in Prague (Czech Republic).

2000: ORION is awarded the license to carry the Austrian coat of arms by the Ministry for Economics and Labor, for long-term outstanding achievements for the Austrian economy from all family members and the company's entire workforce. ORION's quality management system receives the international certificate ISO 9001:2000 confirmation.

2002: Opening of new store in Gerasdorf near Vienna: ORION Licht Nord

2005: Opening of a new store in Bratislava.

2006: Austria's Labor Ministry honors ORIONs commitment to high quality vocational training with its National Award. Since 1950 hundreds of young people have successfully completed their apprenticeship at Orion, becoming highly skilled craftsmen and -women. The fourth generation of the Molecz family – Florian and Bastian – join the company.

2009: Opening of a new Orion Showroom in Graz.

2011: Opening of a second Orion Showroom in Prag Ruzyne.

2012: Leopold Molecz receives the honorary title "Kommerzialrat" (Councilor of Commerce) for his outstanding achievements for Austria's economy.

2014: Austrian artisan craftsmanship is held in high esteem in Asia: Far Eastern countries gain increasing importance in Orion's export structure.

2015: The third generation takes on business leadership: Peter, Paul and Michael Molecz, all successful members in Orion's management since 1987.

What started out in 1948 as a simple sales agent has grown into a modern, Austrian family owned-business producing world renowned high quality lighting in all styles

Produktion

Qualität für höchste Ansprüche

„Design by ORION“ Leuchten werden fast ausschließlich in der ORION Leuchtenfabrik in Wien Liesing hergestellt. Hier wird österreichisches Kunsthandwerk mit automatisierter Serienfertigung kundenorientiert verbunden. Jede Leuchte durchläuft mehrere Produktionsschritte: von der Entwicklung des Designs, über die Verarbeitung der Rohmaterialien bis zum Zusammenfügen der einzelnen Komponenten und der abschließenden Kontrolle.

Entwicklung & Design: Am Anfang war der Plan

Die Geschichte jeder einzelnen ORION-Leuchte beginnt schon vor der Fertigung. Denn zuerst braucht es einen Bauplan. Dieser wird im Hause von der Idee über die Konzeption bis zum fertigen „Design by ORION“ ausgefeilt. Ein Musterstück der neuen Leuchte wird angefertigt und kritisch beäugt. Wenn es den Anforderungen von ORION entspricht, darf es entweder als Produktserie in Produktion gehen oder wird als Lösung für ein Projekt erzeugt.

Arbeitsvorbereitung: Und es wurde eine Liste

Für jede Leuchte muss im nächsten Schritt eine so genannte Stückliste erstellt werden. Das ist im Wesentlichen eine Checklist, die sämtliche Teile einer Leuchte beinhaltet. Sobald die für ein einzelnes Modell erhältlich ist, kann der eigentliche Arbeitsauftrag bearbeitet werden. Dazu werden sämtliche benötigten Materialien kommissioniert und die einzelnen Abteilungen mit ihrem jeweils benötigtem Material versorgt.

Grundmaterial: Eine hochwertige Basis

Die Basis der meisten Leuchten aus dem Hause ORION besteht aus Messing, also einer Legierung aus Kupfer und Zink. Um über viele Jahre den gleichen hohen Qualitätsstandard zu bieten, sind wir darum bemüht, das Messing stets von den gleichen Produzenten zu beziehen. Aktuell sind das Hersteller vorwiegend aus Deutschland. Messing als Grundmaterial ist höherwertig als Eisen, weil es rostfrei und damit besonders langlebig ist. Diese Qualität hat aber auch ihren Preis: Messing ist sowohl teurer, als auch aufwändiger in der Bearbeitung als Eisen.

Werkstätte: Präzision aus dem Handgelenk

Das Rohmaterial unserer Leuchten kommt zunächst in die Werkstatt. Durch verschiedene Bearbeitungsmethoden erhalten die einzelnen Teile ihre Grundform: Stanzen in der Druckpresse, Trennen, Bohren, Biegen, Löten, Fräsen und auch Einschneiden von Gewinden. Die WerkstattmitarbeiterInnen kontrollieren jedes Teil sorgfältig, bevor es in die Oberflächenabteilungen wandert.

Schleiferei & Putzerei: Der erste Schliff

Dort angekommen müssen die Teile zuerst mechanisch behandelt werden. Kleinere Bestandteile der Leuchten verlieren in Kugelpoliermaschinen ihre ungewollten Ecken und Kanten, größere müssen in der Schleiferei manuell Stück für Stück behandelt werden. Im nächsten Schritt werden die Teile entfettet und chemisch gesäubert, um sämtliche Rückstände für die edle ORION Oberflächenbehandlung zu beseitigen.

Galvanik & Lackiererei: Farbe bekennen

Sind die Bauteile einmal sauber, dürfen sie in der vollautomatisierten Galvanikabteilung ein Bad nehmen – und den schönen Gold- oder Chromglanz anlegen, für den die Leuchten von ORION geschätzt werden. Oberflächen, wie „Patina“ oder „Bronze“ werden danach nochmals per Hand schattiert, um Ihr charakteristisches Schliffbild zu erhalten. Danach erhalten die Materialien Ihre letzte Oberflächenbehandlung in der Lackiererei, wo alle Teile mit einem Schutzlack überzogen werden, der anschließend in Öfen bei ca. 120 Grad Celsius gehärtet wird. Bei ORION kommt ein elektrostatisches Lackierverfahren zur Anwendung. Danach wird jedes Stück separat einer erneuten strengen Kontrolle unterzogen. Übrigens: Sowohl in der Entfettung als auch in der Galvanik entstehen mit Schadstoffen belastete Abwässer. Um die Vorgänge in der Leuchtenfabrik maximal umweltfreundlich zu gestalten, verfügt das ORION Werk über seine eigene Kläranlage , wo alle entstehenden Abwässer wieder aufbereitet werden, bevor sie dem Kreislauf ein weiteres Mal zugeführt werden. Eine weitere Besonderheit von ORION.

Montage: Komplexe Handarbeit

In der Montageabteilung bzw. auch in Heimarbeit werden die einzelnen Teile zu kompletten Beleuchtungskörpern zusammengebaut. Dabei herrscht das „One on One“-Prinzip: Alle Bestandteile einer ORION Leuchte werden von dem/der gleichen MontagemitarbeiterIn zusammengesetzt: Vom Ketteln des Kristallbehangs übers Zusammenschrauben des Grundgestells bis zur Zusammenstellung der fertigen Leuchtenkomposition. Dadurch werden Fehlerquellen vermieden und unser hohes Qualitätsniveau erreicht. Besonders bei der Montage von Kristalllustern ist eine immense Fingerfertigkeit erforderlich.

Endkontrolle & Verpackung: Geprüfte Qualität, für weltweiten Transport verpackt

Sobald eine Leuchte aus dem Programm von „Design by ORION“ fertiggestellt ist, muss sie noch weitere Tests bestehen: einen optischen, ob die Leuchte korrekt zusammengestellt ist und vor allem, ob die Oberfläche der fertigen Leuchte makellos ist, und einen elektrischen Test, bei der die Leuchte auf Funktionstüchtigkeit überprüft wird. Erstserien müssen zusätzlich noch ins Labor zur Zertifizierung. Wenn die ORION-Leuchte sämtliche Tests positiv durchlaufen hat, kann sie verpackt und weiter ins Zentrallager geschickt werden, von wo sie ihre Reise an ihren Bestimmungsort antritt.

Production

Quality meeting highest standards

"Design by ORION" lighting is manufactured almost exclusively in the ORION light factory in the Liesing district of Vienna, combining Austrian craftsmanship with automated, customer-focused series production. Every light goes through a number of production stages, from design development to the raw materials processing through to the assembly of individual components and final inspection.

Development & Design: Everything starts with a plan ...

The story of each ORION-light begins long before production. It starts with a blueprint of the construction – meticulously developed from the idea over the production concept to the final "Design by ORION". A sample item of each new light is made and critically studied. If it meets ORION's demands, then it either turns into a product series or is manufactured as resolution of a special project.

Process Planning: ... which turns into a check-list

A so-called itemized check-list is compiled for every light, containing all its components. As soon as it is available for every light model the actual manufacturing order can be processed. All necessary materials order picked and the individual departments supplied with them.

Basic Materials: A premium quality foundation

Most ORION lights have a base made of brass, an alloy of copper and zinc. To maintain identical high quality standards over the course of many years, we endeavor to obtain all brass from the same producers. Currently these are mainly manufacturers in Germany. Brass as basic material is superior to iron, as it is stainless and thus of high durability. This quality comes at a price – not only is brass more expensive, but also more demanding in workmanship.

Workshop: Precision (every step of the way)

The raw materials for our lights first enter the workshop. Using various processing methods, the individual components receive their basic form: Blanking in the pressure press, disconnecting, drilling, bending, soldering, milling and cutting threads. The workshop employees carefully control every piece before it moves on to the surface finishing departments.

Grinding and cleaning shops: The first polish

On arrival, the components are first treated mechanically. Smaller light components lose their rough edges in steel ball polishing machines; large ones are manually ground piece by piece. In the next step the parts are degreased and chemically cleaned to eliminate any residue before the premium ORION finishing.

Electroplating and paint shop: True colors

As soon as the components are clean, they "take a bath" in the fully automated electroplating department – to receive the fine gold- or chrome-shine the ORION lights are admired for. Surfaces

such as "Bronze" or "Patina" are hand-shaded afterwards to obtain their characteristic micro-sectioning. Afterwards the components receive their final finish in the paint shop, where all parts are covered in a protective varnish which is then case-hardened in ovens at app. 120° degrees Celsius. ORION uses an electro-static paint procedure. Once more every component separately undergoes yet another a strict quality control. Incidentally: Degreasing as well as electroplating create polluted industrial sewage. For all procedures in the lighting factory to be as environmentally friendly as possible, the ORION factory has its own purification plant in which all sewage is treated before it re-enters the cycle of use. Another ORION specialty. For us ORION quality means also conserving the quality of our environment.

Assembly: Complex hand-craft

The individual components are assembled to completed lighting fixtures in the assembly department respectively in homework. We work with the "one on one" principle: All components of one ORION light are assembled by one assembly worker: From linking the crystal hangings over screwing together the basic frame to arranging the final lighting composition. This helps avoid error sources and lets us reach our superior quality level. The assembly of crystal chandeliers for instance requires an incredible amount of skilled handiwork.

Final Inspection& Packaging: Tested quality, packaged for worldwide shipping

As soon as a light from the "Design by ORION"-series is finished, it must undergo further testing: a visual test whether the light has been assembled correctly and particularly whether the finishing is immaculate, an electric test checking the functioning of the light. First series also go to the laboratory for certification. If ORION lights have passed all tests, they are packaged, sent to the distribution center and from there they go on the journey to their final destination.
