Massimiliano and Andrea Tosetto

Coniugando il know-how tecnico con il miglior design *Made in Italy*, l'azienda veneziana Lodes progetta e produce soluzioni illuminotecniche d'arredo d'interni ed esterni dal 1950.

Nata dalla passione per il vetro del fondatore Angelo Tosetto, e guidata dalla costante ricerca tecnologica, l'azienda si è trasformata in uno dei principali designer e produttori europei di illuminazione decorativa, attualmente attiva in 90 mercati nel mondo.

Oggi Lodes rappresenta un percorso evolutivo, attraverso tre generazioni, dalla pura passione alle più sorprendenti soluzioni architettoniche, grazie a sorgenti luminose in cui design contemporaneo e tecnologia di punta si integrano con materiali di altissima qualità, sapientemente sviluppati con le migliori tecniche di lavorazione. Studio Italia Design è stata selezionata come una delle aziende italiane più dinamiche secondo l'indagine "Campioni della crescita 2020", così come nel 2021, pubblicata su "Affari & Finanza" di Repubblica.

Innovation and continued research drive Lodes' creative process and product development. Our internal workshop allows us to go from idea to prototype in a matter of hours, and to conceive the most relevant lighting solution.

We offer *mains voltage and low voltage* driverless LED modules – efficient solutions to effectively provide the same light quality as halogen bulbs – which we design and manufacture.

Colour Rendering Index (CRI) is the value that measures the ability of a light source to reproduce the colours of an object. All our LED light sources offer CRI 90 or higher, reflecting the natural colour of objects.

Light colour temperature is expressed in Kelvin degrees and corresponds to the hue emitted by the light source. At 2700 K or 3000 K, our LED modules deliver *warm and emotional light*. All our LED sources provide the same *quality of light colour*.

Colour variations are within the 3rd step of the MacAdam ellipse and are imperceptible to the human eye, which means that different lamps can be combined harmoniously in the same environment.

The *efficiency* of a light source is calculated by dividing the number of lumens by the number of watts (lm / W). The efficiency of our LED modules translates in energy saving.

The *long lifespan* of our LED light sources (> 80,000 hours guaranteed) saves maintenance and replacement costs compared to light bulbs. And, unlike conventional bulbs, LEDs rarely have malfunctions.

L'innovazione e la ricerca continua guidano il processo creativo e lo sviluppo dei prodotti di Lodes. L'officina interna all'azienda permette di passare velocemente dall'idea al prototipo, per concepire la soluzione di illuminazione più pertinente.

Offriamo moduli LED senza driver *a tensione di rete e a bassa tensione*, soluzioni efficienti che progettiamo e produciamo per fornire efficacemente la stessa qualità di luce delle lampadine alogene.

Il *Colour Rendering Index* (CRI) è il valore che misura la capacità di una sorgente luminosa di riprodurre i colori di un oggetto. Tutte le nostre sorgenti luminose a LED offrono CRI uguale o superiore a 90, che restituisce il colore naturale degli oggetti.

La *temperatura del colore della luce* è espressa in gradi Kelvin e corrisponde alla tonalità emessa dalla sorgente luminosa. Con 2700 K o 3000 K, i nostri LED forniscono una *luce calda ed emozionale*. Tutte le nostre sorgenti LED forniscono la stessa *qualità di colore della luce*.

Le variazioni di colore rientrano nel 3°step dell'ellisse di MacAdam e sono impercettibili all'occhio umano, il che significa che lampade diverse possono essere combinate armoniosamente nello stesso ambiente.

L'*efficienza* di una sorgente luminosa si calcola dividendo il numero di lumen per il numero di watt (lm / W). L'efficienza dei nostri moduli LED si traduce in risparmio energetico.

La *lunga durata* delle nostre sorgenti luminose a LED (>80.000 ore garantite) consente di risparmiare sui costi di manutenzione e di sostituzione rispetto alle lampadine. E, a differenza delle lampadine convenzionali, i LED raramente presentano malfunzionamenti.

Since the early 2000s our company (then Studio Italia Design) has invited external designers to collaborate with our R&D team. Our workshop is the place where designers' creative ideas are shaped, where elaborate sketches give life to visions that evolve until they reach the form we all desire. The encounter of external design perspectives with our solid manufacturing know-how generates fresh and captivating contemporary product narratives.

Fin dai primi anni 2000 la nostra azienda (allora Studio Italia Design) ha invitato designer esterni a collaborare con il nostro team di ricerca e sviluppo. Il nostro laboratorio è il luogo dove le idee creative dei designer prendono forma, dove elaborati schizzi danno vita a visioni che si evolvono fino a raggiungere la forma desiderata. L'incontro di prospettive progettuali esterne con il nostro solido know-how produttivo genera narrazioni di prodotto contemporanee fresche e accattivanti.

Marco Dessì

Studio Marco Dessì is a multidisciplinary design studio based in Vienna. The studio's approach is practical and collaborative, where design is understood as an interactive process. Self-initiated ventures serve to experiment with materials and test processes that can be later applied onto commercial projects and/or developed further to meet the requirements of industrial or handmade replication. Commissioned design work always starts with immediate study of the client, their respective production methods and methods’ inherent potentials. Dessì's studio is not committed to any particular style, preferred material or unified formula, but rather regards designing as a trade characterised by a deep understanding of materials, processes and how the two are linked. The way in which an object is produced has a direct influence over its aesthetic appearance and the story that it tells. In his work, Marco Dessì values transparency in terms of a consistent link between the process of designing and the actual conditions of production. Established in 2008, the studio works with a list of international clients and cultural institutions on a variety of scales, ranging from furniture and product design to spatial solutions.

Marco Dessì è uno studio di design multidisciplinare con sede a Vienna. Adottando un approccio pratico e collaborativo, lo studio concepisce il design come un processo interattivo. Le iniziative autonome si inseriscono in un'ottica di sperimentazione dei materiali e dei processi finalizzata alla successiva applicazione ai progetti commerciali e / o all'ulteriore sviluppo in funzione dei requisiti di produzione industriale o artigianale. I lavori commissionati non possono prescindere, in primo luogo, da un'analisi accurata del cliente, dei rispettivi metodi produttivi e delle relative potenzialità. Lo studio Dessì non si ispira ad uno stile specifico né predilige un materiale o si basa su una formula universale, bensì si dedica alla progettazione come attività caratterizzata da una profonda comprensione dei materiali, dei processi e del legame tra tali elementi. Il modo in cui un oggetto viene prodotto incide direttamente sulla sua estetica e sulla storia che racconta. Per questo, nei propri lavori Marco Dessì fa della trasparenza il nesso coerente tra il processo di progettazione e le effettive condizioni produttive. Fondato nel 2008, lo studio collabora con clienti internazionali e istituzioni culturali impegnate in settori eterogenei che spaziano dalla progettazione di arredi e prodotti alle soluzioni spaziali.

Patrick Norguet

Patrick Norguet approaches objects and design from a graphical perspective. Since childhood, he has preferred sketchbooks to textbooks, filling them up with sketches and drawings. A “hands-on” approach of industry and design studies in Paris (ESDI) mark the unusual profile of this constructive rebel. His career underwent a dramatic change in 2000 when Giulio Cappellini spotted his now famous Rainbow Chair. He joined the circle of designers that matter and created his Parisian studio. Since that time, he has been designing for major producers and renowned brands. For Patrick Norguet, design is first and foremost about happy encounters. What he is most passionate about is exchanging with manufacturers, discovering their know-how; the impulse of a creative intention refined by technical constraints, economic stakes and the expectations of a user whom he hopes to discreetly but durably win over. Drawing inspiration from everything that surrounds him, Patrick Norguet does not follow trends but seeks to give shape to products whose relevance and modernity would withstand the test of time: “A well-designed object, an object created through generous collaboration is timeless.” From consumer products to luxury objects, Patrick Norguet leaves an impression of authenticity and elegance. Today, he is an essential figure on the international design scene.

Patrick Norguet si avvicina agli oggetti e al design da una prospettiva grafica. Fin dall'infanzia ha preferito i taccuini da disegno ai libri di testo, riempiendoli di schizzi e bozzetti. Un approccio “pratico” agli studi industriali e di design a Parigi (ESDI) segna il profilo insolito di questo ribelle costruttivo. La sua carriera ha subito una svolta straordinaria nel 2000, quando Giulio Cappellini ha notato la sua ormai famosa Rainbow Chair. Entra a far parte della cerchia dei designer che contano e crea il suo studio parigino. Da allora, progetta per grandi produttori e marche rinomate. Per Patrick Norguet, il design è prima di tutto sinonimo di incontri felici. Ciò che più lo appassiona è lo scambio con i produttori, la scoperta del loro know-how; l'impulso di un'intenzione creativa affinata da vincoli tecnici, da aspetti economici e dalle aspettative dell'utilizzatore che spera di conquistare in modo discreto ma duraturo. Traendo ispirazione da tutto ciò che lo circonda, Patrick Norguet non segue le tendenze, ma cerca di dare forma a prodotti la cui attualità e modernità possano resistere alla prova del tempo: “Un oggetto ben progettato, un oggetto creato grazie a una collaborazione generosa è senza tempo”. Dai prodotti di consumo agli oggetti di lusso, Patrick Norguet lascia un'impressione di autenticità ed eleganza. È oggi una figura essenziale nel panorama del design internazionale.

Spider

Spider is a round suspension lamp resembling an eye that can look into any part of the room. By adjusting the angle of the diffuser, the light beam emitted by the LED light can be directed towards any specific point. When installed on the different clusters available, it can create numerous lighting patterns, from functional to decorative, which can be dimmed at will. In Spider, the simplicity of the looks underscores the versatility of its performance.

Regolando l'angolo del diffusore si può infatti dirigere il fascio di luce a LED su un particolare punto di interesse, mentre montata sui diversi cluster disponibili può creare molteplici schemi di luce, dal funzionale al decorativo, dimmerabili a piacere. In Spider, la semplicità della forma esalta la versatilità delle prestazioni.

A–Tube Nano

A–Tube Nano is a suspension lamp which interprets light in its simplest form by creating a thin luminous line in the living spaces. At the lower end of the lightweight aluminium structure, a transparent methacrylate diffuser houses an LED module whose light creates a soft, welcoming atmosphere. The three sizes and six statement finishes allow to create clusters of evocative lighting.

A–Tube Nano è una lampada a sospensione che interpreta la luce nella sua forma più essenziale disegnando una sottile linea luminosa nello spazio abitativo. All'estremità inferiore della leggera struttura in alluminio, un diffusore in metacrilato trasparente ospita un modulo LED la cui luce crea un'atmosfera morbida e avvolgente. Le tre dimensioni e le sei distinte finiture permettono di realizzare suggestive composizioni su cluster.

Cima

Inspired by the function of the jam cleats found in sailing boats, Cima – a nautical rope in Italian – is a “suspended” lamp characterised by a ceiling-to-floor rope, a sleek and highly functional design element. A joint that holds the lamp body slides vertically along the rope, while the counterweight allows to manage any excess rope. The simple cylindrical shapes and the black colour of these elements highlight the three brilliant finishes of the rope, vibrant accents to suit any interiors and décor mood.

Ispirata dalla funzione degli strozzascotte delle barche a vela, Cima è una lampada “sospesa” caratterizzata da una fune a tutt’altezza, elemento di design elegante e altamente funzionale. Lungo la fune scorre verticalmente un giunto che regge il corpo lampada, mentre il contrappeso permette di gestire l’eventuale fune in eccesso. Le semplici forme cilindriche e il colore nero di questi elementi risaltano le tre finiture brillanti della fune, accenti vibranti per qualsiasi ambiente e mood d’arredo.

S'inspirant de la fonction des taquets de blocage des voiliers, Cima – une corde nautique en italien – est une lampe « suspendue » caractérisée par une corde plafond-sol, élément de design élégant et fonctionnel. Le raccord qui supporte le corps de la lampe se déplace le long de la corde, tandis que le contrepoids permet d'ajuster l'excès de corde. Les formes cylindriques simples et la couleur noire de ces éléments mettent en valeur les trois finitions brillantes de la corde pour s'adapter à tous les intérieurs et à tous les styles de décoration. ● FR

Inspiriert von der Funktion der Klampen, die in Segelbooten zu finden sind, ist Cima – das bedeutet Schiffsseil auf Italienisch – eine „hängende Leuchte“, die sich durch ein Decken-Boden-Seil auszeichnet, ein elegantes und hoch funktionales Designelement. Entlang des Seils bewegt sich ein Gelenk, das den Lampenkörper stützt, während das Gegengewicht es ermöglicht, einen eventuellen Seilüberschuss zu justieren. Die schlichten Formen und die schwarze Farbe dieser Elemente unterstreichen die drei brillanten Ausführungen des Seils, vibrierende Akzente, die für jedes Interieur und jede Dekor Stimmung geeignet sind. ● DE

Inspirada en la función de las cornamusas que se encuentran en los veleros, Cima – una cuerda náutica en italiano – es una lámpara “suspendida” caracterizada por una cuerda que va del techo al suelo, un elemento de diseño elegante y sumamente funcional. A lo largo de la cuerda se mueve verticalmente una articulación que sujeta el cuerpo de la lámpara, mientras que el contrapeso permite reajustar cualquier exceso de cuerda. Las sencillas formas cilíndricas y el color negro de estos elementos resaltan los tres acabados brillantes de la cuerda, las notas vibrantes de cualquier interior y decoración de ambiente. ● ES

Вдохновленный функцией палубных стопоров, используемых на парусных лодках, светильник Cima – «корабельный канат» на итальянском – представляет собой подвешенную лампу, с тросом в полную высоту, задуманным как изысканный и высоко функциональный элемент дизайна. Вдоль троса вертикально перемещается шарнир, поддерживающий корпус лампы, а противовес позволяет отрегулировать избыток троса. Простые цилиндрические формы и черный цвет этих элементов подчеркивают три яркие отделки троса, вибрирующие тональности, подходящие для любых интерьеров и стилей. ● RU

受帆船中防滑钉的功能之启发,Cima—意大利语意为航海绳—是一款特征显著的“悬浮灯”,一条全高式绳索便是其优雅且功能强大的设计元素。一块用来举持灯体的接头沿绳索垂直延伸,而配重件则可让您调节管理绳索的任何多余之处。这些元素的简约圆柱形状与黑色突出了绳索的三种光鲜饰面,令任何室内环境与装饰风尚活力四射。● ZH

Five perfect spheres floating in the air like gentle glass bubbles. Random Solo revisits the concept of the Random suspension lamp by parting the original three-piece cluster and adding two new blown glass spheres. The five sizes and six different finishes available offer ample styling freedom, both as individually suspended light points and in lightweight and lively combinations on clusters. The new fingerprint resistant frosted white finish magically changes the perception of the sphere and its volume, opening new opportunities for interior decoration.

Random

A lightweight, blown glass suspension light, Random is made up of three round diffusers of different sizes which form one simple, eye-catching whole. Each diffuser has an LED light source which emits warm white light. When grouped together on a cluster, Random light fixtures form a poetic composition like soap bubbles, enhanced by the glossy coloured finishes which add a touch of character and originality.

Leggerissima lampada a sospensione in vetro soffiato, Random è composta da tre diffusori sferici di dimensioni diverse che formano un'entità semplice e vivace. Ogni diffusore è dotato di una sorgente luminosa a LED che fornisce una calda luce bianca. Raggruppate su cluster le lampade Random danno vita a composizioni poetiche come giochi di bolle di sapone, che le finiture lucide sfumate arricchiscono di carattere e originalità.

Jefferson

The Jefferson suspension lamp designed by Luca Nichetto is reminiscent of music and iconic images in psychedelic works of art from the 1960s. The vortex motif decorating the diffuser is embellished by the timeless classicism of Bohemian crystal, which diffuses evocative atmospheres of light. Dynamic in its many sizes and multiple compositions, Jefferson's elegance keeps up with the excellent performance of LED interior lighting.

La lampada a sospensione Jefferson disegnata da Luca Nichetto rimanda alla musica e alle immagini iconiche in opere d'arte psichedeliche degli anni Sessanta. Il motivo a vortice che decora il diffusore è impreziosito dalla classicità senza tempo del cristallo di Boemia, che diffonde suggestive atmosfere di luce. Dinamica nelle diverse dimensioni e in composizioni multiple, l'eleganza di Jefferson non rinuncia alle eccellenti prestazioni della luce interna a LED.

La lampe à suspension Jefferson dessinée par Luca Nichetto fait référence à la musique et aux images emblématiques des œuvres d'art psychédélics des années soixante. Le motif vortex qui orne le diffuseur est rehaussé par le classicisme intemporel du cristal de Bohême, qui diffuse des atmosphères de lumière suggestives. Dynamique dans différentes tailles et dans de multiples compositions, l'élégance de Jefferson ne renonce pas aux excellentes performances de l'éclairage intérieur LED. ● FR

Die von Luca Nichetto entworfene Hängeleuchte „Jefferson“ erinnert an die Musik und die ikonischen Darstellungen in psychedelischen Kunstwerken der sechziger Jahre. Die Wirbel-Optik des Diffusors wird aufgewertet durch den klassisch-zeitlosen Stil des böhmischen Kristalls, das suggestive Lichtstimmungen erzeugt. Erhältlich in verschiedenen Größen und vielfältigen Kompositionen, verzichtet die Eleganz von Jefferson nicht auf die hervorragende Leistung der LED-Innenbeleuchtung. ● DE

Подвесной светильник Jefferson, дизайн Лука Никетто, вызывает в памяти музыку и культовые изображения на психоделических произведениях шестидесятых годов. Ценность вихревому украшению диффузора придает вечная классика богемского хрустала, благодаря которому создается необыкновенная световая атмосфера. Элегантная и динамичная за счет различных размеров и множественных комбинаций модель Jefferson не отказывается от превосходных характеристик внутреннего светодиодного освещения. ● RU

Immédiateté de fonction, simplicité des lignes, matériaux durables, modularité en fonction des goûts personnels. S'inspirant des abat-jours des ateliers d'artistes du début du XXe siècle, JIM est un système de lampes à suspension arborant des formes distinctives et une composition polyvalente qui s'adapte à tous les styles d'habitation. La gamme chromatique souligne encore plus la polyvalence de JIM : les quatre différentes finitions disponibles pour les diffuseurs peuvent s'assortir, au choix, aux trois différentes tonalités du crochet de soutien. ● FR

Улучшенная функциональность, простота линий, прочные материалы, модульная композиция. Puzzle, Puzzle Twist

Essential forms in metal, square and rectangular, which seem to disappear in the ceiling or wall. A clear-cut geometry that plays on the effect of overlapping square shapes: thanks to its two swivel joints, Puzzle Twist can be adjusted at will to create suggestive plays of light on the walls and ceilings, making for a truly personalised atmosphere. With Puzzle lamps, light becomes the feature element of living spaces, creating soft, geometric effects.

Forme essenziali in metallo, quadrati e rettangoli che sembrano scomparire nel soffitto o nella parete. Una geometria rigorosa che gioca con un effetto di sovrapposizioni di forme quadrate: con i giunti flessibili di cui è dotata, Puzzle Twist può essere regolata a piacimento per creare suggestivi giochi di luce su pareti e soffitti rendendo l'atmosfera del tutto personale. Le lampade Puzzle rendono la luce il vero ornamento degli ambienti abitativi creando effetti di morbide geometrie.

A Single Canopies

Single canopies are ideal for highlighting the corner of a room or enhancing single light sources. They can also be used to create multiple custom combinations on high ceilings or in situations which do not allow lights to be grouped in a cluster.

B Track Systems

Track systems offers various possibilities of in-line composition with a variable number of lamps depending on the preferred type of installation, i.e. height-aligned or staggered suspensions.

C Round and Rectangular Cluster Systems

Our multiple canopies, round or rectangular, are functional systems to create suspended compositions with a variable but predefined number of holes.

D Radial Systems

Radial systems are an innovative way to separately manage various suspension cables starting from one single canopy—particularly useful to illuminate rooms with irregular ceilings.

A Rosoni Singoli

I rosoni singoli si prestano ad enfatizzare gli angoli di una stanza o a valorizzare i singoli corpi luce. Possono inoltre essere utilizzati per creare composizioni multiple personalizzate su soffitti molto alti o nelle situazioni che non permettono l'utilizzo di cluster.

B Sistemi a Binario Lineare

I sistemi a binario offrono varie possibilità di composizione in linea con un numero variabile di lampade a seconda del tipo di installazione desiderato, ossia sospensioni allineate in altezza o sfalsate.

C Sistemi Cluster Rotondi e Rettangolari

I nostri rosoni multipli, rotondi o rettangolari, sono sistemi funzionali per creare composizioni sospese con un numero di fori variabile ma predefinito.

D Sistemi Radiali

I sistemi radiali sono un modo innovativo per gestire separatamente diversi cavi di sospensione a partire da un unico rosone – particolarmente utili per illuminare ambienti con soffitti irregolari.

The *matte black* finish clads metal lamps with confidence and sophistication. Its quintessential toughness makes it an understated solid block on which to build a personal style of décor.

Art. 6 Garanzie
I prodotti forniti sono coperti da garanzia per difetti di materiale e / o fabbricazione per un periodo di 24 mesi dalla consegna se il Compratore risulta essere una persona fisica, diversamente il periodo di garanzia sarà di 12 mesi dalla consegna. Il Venditore sostituisce i prodotti resi in detto periodo di garanzia e riconosciuti difettosi per vizi d'origine ovvero in alternativa ed a sua scelta accreditata al Compratore una somma pari al prezzo già fatturato dei prodotti stessi, restando espressamente escluso e rinunciato qualsiasi diverso diritto o pretesa del Compratore anche a titolo di risarcimento danni diretti e/o indiretti o di rimborso di costi dallo stesso sostenuti (quali costo di riprese, di assistenza tecnica, di richiamo, ecc.). Il Venditore anticiperà l'invio del prodotto in sostituzione, fatturandolo regolarmente, andando poi ad accreditare l'importo alla riconsegna del prodotto difettoso reso. Le spese di trasporto saranno a carico del Venditore. Qualora l'articolo oggetto del reso venisse riconsegnato in un imballo non originale inadeguato con conseguenti danni da trasporto, il Venditore non accrediterà al Compratore alcun importo e rinverrà al mittente, a sue spese il prodotto. Qualora il reso venisse effettuato per presunti vizi d'origine ma dopo il controllo effettuato dal Venditore lo stesso venisse ritenuto (i) infondato, per assenza di vizi; (ii) ulteriormente danneggiato da insufficiente imballaggio nel trasporto di ritorno (iii) viziato da manomissione posta in essere dal Compratore, verranno addebitati a quest'ultimo tutti i costi di trasporto nonché l'intero valore del prodotto. Eventuali difettosità o non conformità dei prodotti devono essere segnalate dal Compratore per iscritto al Venditore – a pena di decadenza – entro e non oltre 8 gg dalla data di ricevimento della merce; eventuali difetti occulti devono essere segnalati dal Compratore per iscritto al Venditore – sempre a pena di decadenza – entro 8 gg dalla relativa scoperta. Resta inteso che il Venditore non sarà responsabile per alcun vizio ancorché occulto, comunicato per iscritto, oltre 24 mesi dalla consegna della merce. La garanzia non opera ove i difetti rilevati siano imputabili a negligenza del Compratore e/o ad impiego dei prodotti non conforme con le informazioni e le spiegazioni in ogni caso fornite dal Venditore, alle prescrizioni tecniche, ad errata progettazione, applicazione, montaggio o fabbricazione delle strutture ove sono installati, ad errata manutenzione operata da personale non autorizzato, a pulizia impropria in quanto effettuata con modalità o materiali non idonei, ad errato magazzinaggio, movimentazione e trasporto, ad uso improprio od incauto, anche in caso di impianto elettrico e portata dello stesso non idonea, ovvero a circostanze che comunque non possono ricollegarsi a difettosità di produzione da parte del Venditore. Ogni singolo prodotto del Venditore è conforme alla marcatura richiesta dalla Comunità Europea con la direttiva 93/68 (ampliamento della direttiva 73/23) per confermare con una marcatura riconosciuta in tutta Europa, che le lampade sono state sottoposte alle prove di sicurezza elettrica richieste dalle norme Europee EN-60598-1-2 II ed. + CEI EN 60598-1 IV ed. corrispondenti norme italiane CEI 34-21 + CEI 34-23, norme per la sicurezza elettrica a cui fanno riferimento tutti gli istituti, compreso l'IMQ. I prodotti indicati con il marchio UL e / o ETL sono conformi alla normativa UL 1598 / CAN / USA C22.2 No.250.0 o UL 153.

Art. 7 Obblighi del Compratore
Il Compratore è tenuto a prendere immediatamente in consegna i prodotti affidati dal Venditore al vettore, ovvero – se diversamente concordato – a puntualmente ritirarli presso lo stabilimento del Venditore alla data di comunicazione di merce pronta che potrà avvenire con ogni mezzo da parte del Venditore. Ove il Compratore ritardi il ritiro dei prodotti per un periodo superiore a 10 gg, oltre al pagamento del prezzo deve corrispondere al Venditore un adeguato compenso pari al 2% al giorno dell'importo fatturato per il magazzinaggio degli stessi. Il Compratore deve effettuare i pagamenti normalmente, con le modalità e nei termini precisati in fattura. Sui ritardati pagamenti decorreranno, di pieno diritto e senza necessità di costituzione in mora, gli

interessi di cui al D.lgs. n. 231/2002. In caso di ritardo dei pagamenti il Venditore ha diritto a sospendere immediatamente ogni fornitura, anche se dipendente da altri contratti con lo stesso Compratore. Il mancato pagamento nei termini pattuiti comporta in ogni caso la decadenza del Compratore dal beneficio del termine.

Art. 8 Resi
In caso di reso commerciale o in caso di reso per errore del Compratore, il Venditore tratterà un importo pari al 20% minimo del totale a titolo di costo di ricondizionamento dell'articolo. Qualora l'articolo oggetto del reso fosse già stato utilizzato e/o venisse riconsegnato in un imballo non originale inadeguato, con conseguenti danni da trasporto, il Venditore non accrediterà al Compratore nessun importo e rinverrà al mittente, a sue spese, il reso. Verranno presi in considerazione solamente gli articoli presenti nel catalogo e nel listino in vigore al momento della richiesta. Le spese di trasporto sono sempre a carico del Compratore. I resi per riparazione vanno autorizzati solo se la causa del danno è dipesa dal Compratore che dopo aver accettato il costo di riparazione si occuperà a proprie spese di rispedire l'articolo danneggiato in sede e si accollerà poi i costi relativi al trasporto del prodotto riparato.

Art. 9 Forza maggiore
Qualora il Venditore sia impossibilitato a rispettare il contratto per cause di forza maggiore o comunque indipendenti dalla sua volontà, i termini previsti per l'esecuzione della fornitura sono automaticamente prorogati per un periodo equivalente al perdurare degli effetti di tali cause. Qualora la causa impeditiva continui per più di 6 mesi entrambe le parti possono chiedere la risoluzione del contratto ed in tal caso il Venditore restituisce al Compratore gli anticipi eventualmente ricevuti, con esclusione di ogni e qualsiasi onere ulteriore a suo carico.

Art. 10 Contratto
In caso di sottoscrizione di apposito contratto lo stesso con i suoi allegati contiene e riassume le obbligazioni validamente assunte dalle parti e per esse vincolanti. L'adempimento delle parti sarà oggetto di valutazione dell'effettiva esecuzione dei compiti e doveri contrattuali, da effettuarsi in buona fede, onestà e con equità. Le presenti Condizioni Generali di Vendita si applicheranno al contratto salvo deroga risultante da atto scritto o in esso contratto esplicitamente prevista.

Art. 11 Trattamento dei Dati Personali
Il Venditore utilizzerà i dati ricevuti dal Compratore conformemente alle disposizioni vigenti in materia di Privacy secondo l'art. 13 del Regolamento Europeo 2016 / 679 (GDPR). Maggiori informazioni sono disponibili al seguente link: www.lodes.com/area-legale/.
