WE LIGHT UP YOUR IDEAS

www.riperlamp.com

We light up your ideas

After more than 30 years since the establishment of RIPERLAMP we introduce our new corporate identity, an updated image with which we transmit the freshness and elegance needed to design new creations and pieces, aligned with the trends of decorative lighting.

We are evolving internally and so we do it externally, the new logo reflects the transformation that the company is going through, as well as what we want to achieve.

Inspired by the mellow and pleasant waves of the Mediterranean Sea, we announce a renewed blue. Positioning ourselves as a company identified with the culture and Mediterranean way of life.

The icon combines both an architectural and artistic style. On one hand, the architectural style is characterized by straight lines and solid structures, perceptible in the L of the icon. On the other hand, curves and organic shapes, main characteristics of artistic styles, are evident in the free stroke of the R.

Our new slogan "We light up your ideas" is an open statement of intentions. We want to declare the capabilities that we have to satisfy all the needs in the market, and what we can achieve. Which is achieved due to the fact that in RIPERLAMP, we design and manufacture all of our lighting projects from scratch, handcrafted in our facilities located in Valencia.

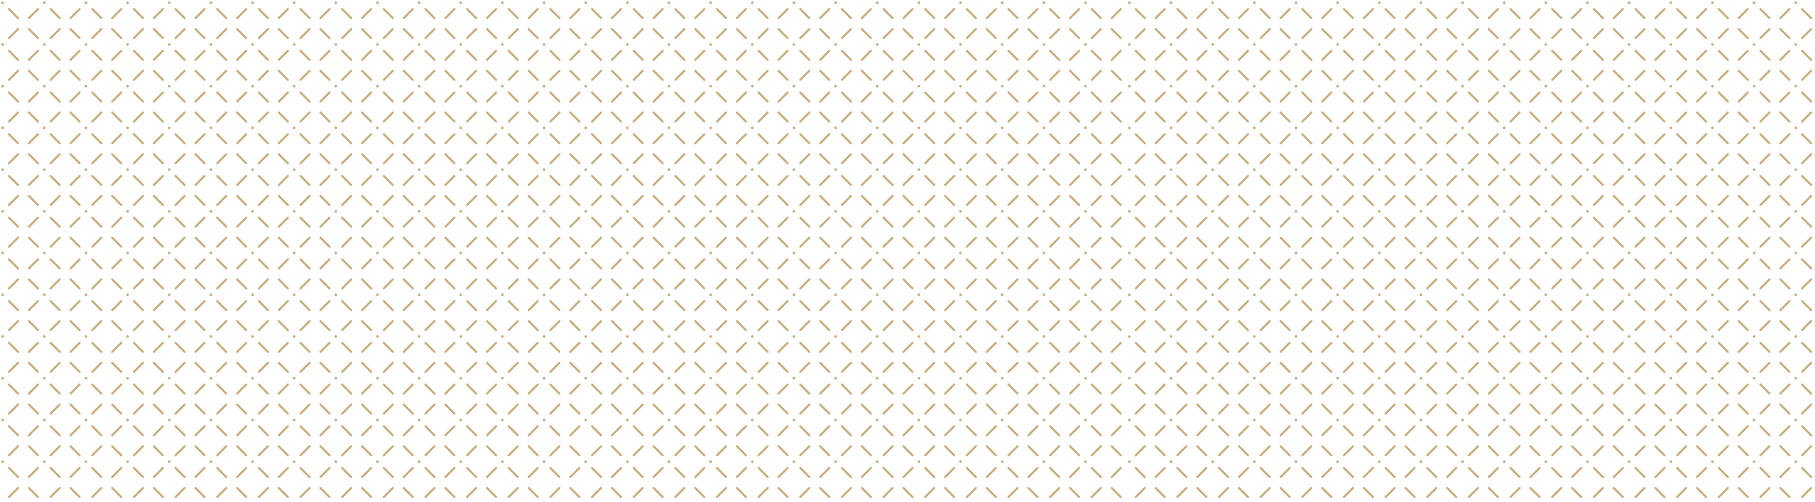

Tras más de 30 años desde el nacimiento de RIPERLAMP, presentamos nuestra nueva identidad corporativa, con una imagen renovada con la que transmitimos la frescura y elegancia necesaria para diseñar nuevas creaciones y piezas, alineadas con las tendencias en iluminación decorativa.

Evolucionamos internamente y también de forma externa, el nuevo logo refleja la transformación que está experimentando la empresa, así como lo que queremos conseguir.

Inspirado en las suaves olas del Mar Mediterráneo, anunciamos un azul renovado. Posicionándonos como una empresa identificada con la cultura y forma de vida Mediterránea.

El icono combina tanto un estilo artístico como arquitectónico. Por una parte, el estilo arquitectónico se caracteriza por formas rectas y estructuras sólidas, que se pueden percibir en la L del icono. Por la otra parte, curvas y formas orgánicas se hacen evidentes en el trazo libre de la R.

Nuestro nuevo slogan “We light up your ideas” es una clara declaración de intenciones. Queremos mostrar las capacidades que tenemos para satisfacer todas las necesidades en el mercado, y lo que podemos conseguir. Esto se debe a que en RIPERLAMP, diseñamos y fabricamos todos nuestros proyectos de iluminación y mueble a medida desde el inicio, fabricados a mano con procesos artesanales, en nuestras instalaciones de Valencia.

Production process

Proceso de producción

As the whole production and design process takes place in our facilities of over 13.000 square meters in Valencia, we are able to offer short delivery times as well as a high-quality standard. Moreover, thanks to the exclusive finishing touches that are applied to the products, we are able to give a unique personality to the pieces we create.

RIPERLAMP's design studio collaborates with craftsmen in order to bring to life innovative designs. Therefore, partnering with artisans becomes a must for providing solutions to the design challenges that face them. In order to create unique pieces, we use both traditional techniques and new technologies.

Ya que todo el proceso de producción se realiza en nuestras instalaciones de más de 13.000 m² en Valencia, podemos ofrecer plazos de entrega más ajustados, así como una elevada calidad. Además, gracias a los exclusivos toques de acabado que aplicamos a los productos, somos capaces de aportar una personalidad única a las piezas.

El estudio de diseño de RIPERLAMP colabora con artesanos para dar vida a diseños innovadores. Por lo tanto, contar con artesanos se convierte en una obligación para proveer de soluciones a los desafíos de diseño. Con la finalidad de crear piezas únicas, usamos tanto técnicas tradicionales como nuevas tecnologías.

Materials

Materiales

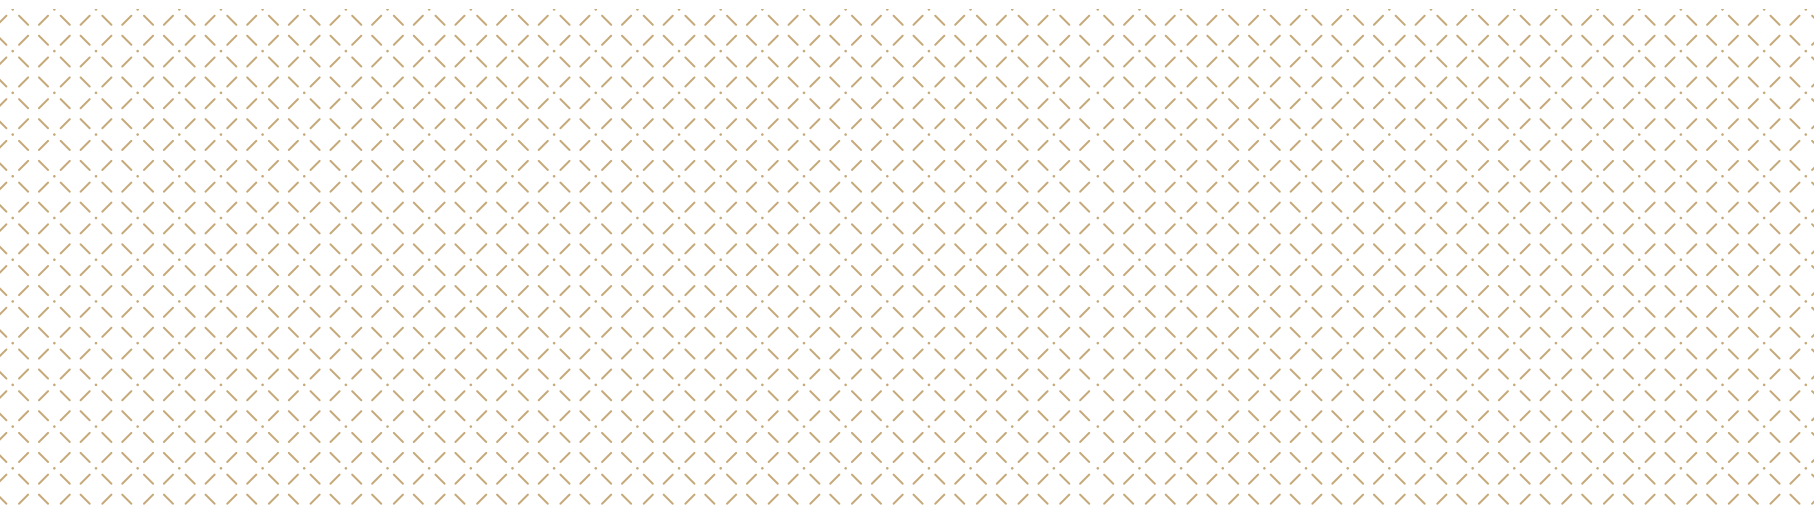

Inspired by the fine arts ideas come to life, which through the use of the finest and most exclusive materials converge into unique designs. Our models are created through the delicacy of our craftsmen and artisans, transforming rooms into particular spaces that create magical dances of lights and shadows where elements such as brass, bronze, wood, alabaster weave together with the cotton and silk.

Inspirado en las bellas artes, las ideas cobran vida, mediante el uso de los materiales nobles y más exclusivos, convergen en diseños únicos. Nuestros modelos se crean mediante la delicadeza de nuestros artesanos, transformando habitaciones en espacios particulares que crean mágicos bailes de luces y sombras donde los elementos como el latón, cristal, madera y alabastro se entrelazan con el algodón y la seda.

Contemporary

Contemporáneo

At RIPERLAMP, we strongly believe that one cannot create modern styles without having worked exhaustively the great classics. We rely on the craftsmanship of our products, and just as a chef cannot make modern or molecular dishes without knowing the traditional, or a painter cannot create abstract paintings without perfectly performing classic painting.

After years of specialization in the great classics of lighting, we can offer more contemporary designs, which create totally unique spaces due to both their technical complexity and quality, achieved thanks to the production processes used by the company.

We want to take advantage of the know-how and be able to satisfy all your needs. Through our extensive research in new manufacturing processes and all of our development in materials, finishes and decorations, we want to continue to add value to our customers, offering them an updated product. Our designs can always be defined by their classic aesthetics. However, under this collection, they are defined by the use of diverse materials, shapes and textures, always reflecting our personality and our culture.

Contemporary collection is based on subtle shapes, colours and textures, which makes them timeless. At the same time, they transmit a whole range of emotion to the spaces where they are located.

As our Design Manager says, “Combining different styles within a single space harmonizes the environment, and makes all its elements stand out, creating harmonious and surprising places.”

En RIPERLAMP creemos que no puedes crear estilos más modernos sin haber trabajado de forma exhaustiva los grandes clásicos. Nos basamos en la artesanía de nuestros productos, e igual que un chef no puede elaborar platos de cocina moderna o molecular sin conocer la tradicional, o un pintor no puede crear cuadros abstractos sin ejecutar a la perfección pintura clásica, nosotros, tras años de especialización en los grandes clásicos de la iluminación, podemos ofrecer diseños más contemporáneos, los cuales crean espacios totalmente únicos debidos tanto a su complejidad técnica, como por su calidad, debido a los procesos de producción que emplea la compañía.

La experiencia es un grado, y a esto le queremos sacar partido y poder satisfacer todas vuestras necesidades. Mediante nuestra amplia investigación en nuevos procesos de fabricación artesanal y todo nuestro desarrollo en materiales, acabados y combinaciones de decoraciones, queremos seguir aportando valor a nuestros clientes, ofreciéndoles un producto actual. Nuestros diseños pueden definirse siempre por su estética clásica, pero en este caso, por el juego de materiales, formas y texturas hemos creado productos que no pueden dejarte indiferente, siempre reflejando nuestra personalidad y nuestra cultura empresarial.

La gama contemporánea se basa en modelos atemporales, seguros, fáciles de ubicar, firmes, pero a la vez no restan ni un ápice de emoción a los espacios donde se ubiquen nuestros productos. Por ello, utilizamos líneas suaves, colores y acabados limpios, tratándose de modelos que se pueden poner tanto en ambientes más clásicos, como compartirlo con lugares modernos.

Como dice nuestro director de diseño, “Combinar diferentes estilos dentro de un mismo espacio armoniza el ambiente, y hace que todos sus elementos destaquen, creando lugares armoniosos y sorprendentes”.

Newlandesa

As a result of a reinterpretation of such an iconic piece within RIPERLAMP's collection, Newlandesa comes to life with a simple yet elegant shape.

Made mainly out of the finest glass, this model can be personalized with an infinite number of decorations and screens combinations, as well as the option to change colours of the light thanks to the recently introduced system.

Designed by Riperlamp's design department.

Kritallos

Quartz word comes from the Greek Kritallos which meant ice. Inspired by this noble material, our design department aims to create unique spaces based on the beautiful lights displayed by the quartz.

Due to the irregular sides, the richness achieved in the atmosphere is absolutely magical, which together with its minimalist appearance will catch everyone's eye.

Designed by Riperlamp's design department.

Quadrangular

Eye-catching wooden wall fixture organic shape, minimalistic concept, natural wood touch and warm indirect light.

The stubbornness turned into a lamp. It is made 100% with natural oak wood carved to the limit. Its metallic details in satin gold makes its very refined ceiling / wall lamp, ideal to illuminate the most exclusive environments alone or in groups. It can be placed in four different orientations which give a great versatility for interior designers. Its sensual and unique geometry makes it the perfect to subtly blend into any environment.

Quadrangular designed by Nacho Timón.

Vulcano

Awesome family of lamps made in iron. Simply spectacular, with a very conceptual design and retro industrial touch.

Vulcano fixtures are made entirely with steel, in a natural rusted longlasting finish.

Different size screens generate a geometric game of light and shadows all over the surface. A simple shape for a really complicated design that turned crazy our in-house designer and engineer.

Vulcano, designed by Nacho Timón.

Bámbola

A collection in apparent permanently rotation movement.

Made entirely in aluminium, and looking like an old sovietic stellite, its spinning top appeareance create a dynamic movement effect. Many colours can be made but we prefer the antique metallic patina to enhance its strong character. Warm atmosphere for intimate ambiances, it is granted by an integrated double led core.

Bámbola, designed by Nacho Timón.

Lola

We decided to change the shape of the moon. Then, our team played with solid brass frames and natural alabaster stone to obtain a collection of magic pendant lamps in different size. Now you can also play with them to fit the right combination.

Lola is a sexy and provocative lamp. Its suggestive transparencies attached to its pronounced curves put you on fire. It is undoubtedly one of the most original and complex lamps of the studio. Its barely 30 mm thick make it a challenge itself, a delicious natural alabaster sandwich with LEDs and brass make it a lightning icon of the 21st century. Selected one by one in the quarry the different veins of their stone faces turn each of these pendants into a unique piece.

They are manufactured in three current shapes that combine with each other and can be placed alone or in groups, aligned on a bar or as a meteor shower incandescent in the most daring stairwell. They fit like a glove in any environment, providing serenity and comfort to that special corner of the project.

Lola designed by Nacho Timón.

Art & Design

Inspired by natural shapes and designs of the most prestigious artists of different genres such as architecture, painting or sculpture, RIPERLAMP presents its Art & Design collection, which compiles all decorative elements such as pendants, wall lamps, floor lamps.

The following artistic pieces are suitable for both classic and more contemporary spaces, due to their particular designs.

The Art & Design collection is for those who are looking for unique and personal piece, which is differentiated due to the exclusive material and execution techniques. Ceramics, marbles, quartz, leather, beads and coloured crystals are reinvented.

The designs of this models show the perfection of the imperfection through the shapes that simulate the organic, the natural, the imperfect, but of great quality in their finishes. They play with cast structures replicating branches, leaves, water lilies, with a wide range of finishes and combinations. In order to craft these pieces, we use production processes from artisans, such as lost wax for brass and aluminium pieces, and hand-blown crystals for drops and glass plates. From RIPERLAMP, in this collection we showcase our most original designs, the finest materials, boldness, all the know-how acquired during our extensive experience and all the R&D, making an original and unique product.

Inspirado en las formas naturales y diseños de los más prestigiosos artistas de diferentes géneros como la arquitectura o la pintura, la escultura, RIPERLAMP presenta su colección orgánica, que compila todos los elementos decorativos como colgantes, lámparas de pared, lámparas de pie.

Las piezas artísticas presentadas son adecuadas tanto para ambientes clásicos como más contemporáneos, debido a sus diseños.

La gama Art & Design es para aquellos que buscan un producto con una alta personalidad, que se diferencie con sus materiales y técnicas de ejecución diferentes. Se reinventan las cerámicas, los mármoles, los abalorios y cristales de colores, los cueros, etc.

Los diseños de los productos muestran la perfección de la imperfección mediante los modelos que simulan lo orgánico, lo natural, lo imperfecto, pero de gran calidad en sus acabados. Juegan con estructuras de fundición simulando en ocasiones ramas, hojas, nenúfares, con amplia gama de acabados y combinaciones. Para ello, utilizamos procesos de producción provenientes de la artesanía, tales como la cera perdida para las piezas de latón y aluminio, y los cristales soplados manualmente para las gotas y platos de cristal.

Desde RIPERLAMP, en esta gama mostramos nuestros diseños más originales, la alta calidad de nuestros materiales, el atrevimiento, todo el know-how adquirido durante nuestra amplia experiencia y todo el I+D+i, haciendo un producto original y único

Outdoor Iluminación de exterior

Inspired by the aesthetics of the great gardens of the nobility during the sixteenth century, we produce impressive decorative pieces that reflect the most attractive organic elements, even artistic representations of contemporary trends. Under the Outdoor collection we present pieces of any of these fine arts.

All outdoor models have a protection degree IP65, which preserves them from water or dust so that electrical system does not get damaged.

We work with noble and finest materials, such as Asfour and Swarovski crystal, brass casted in our own installations by eminent craftsmen, and a multitude of elements that make the durability and quality of our products not only an obligation, but also a corporate value.

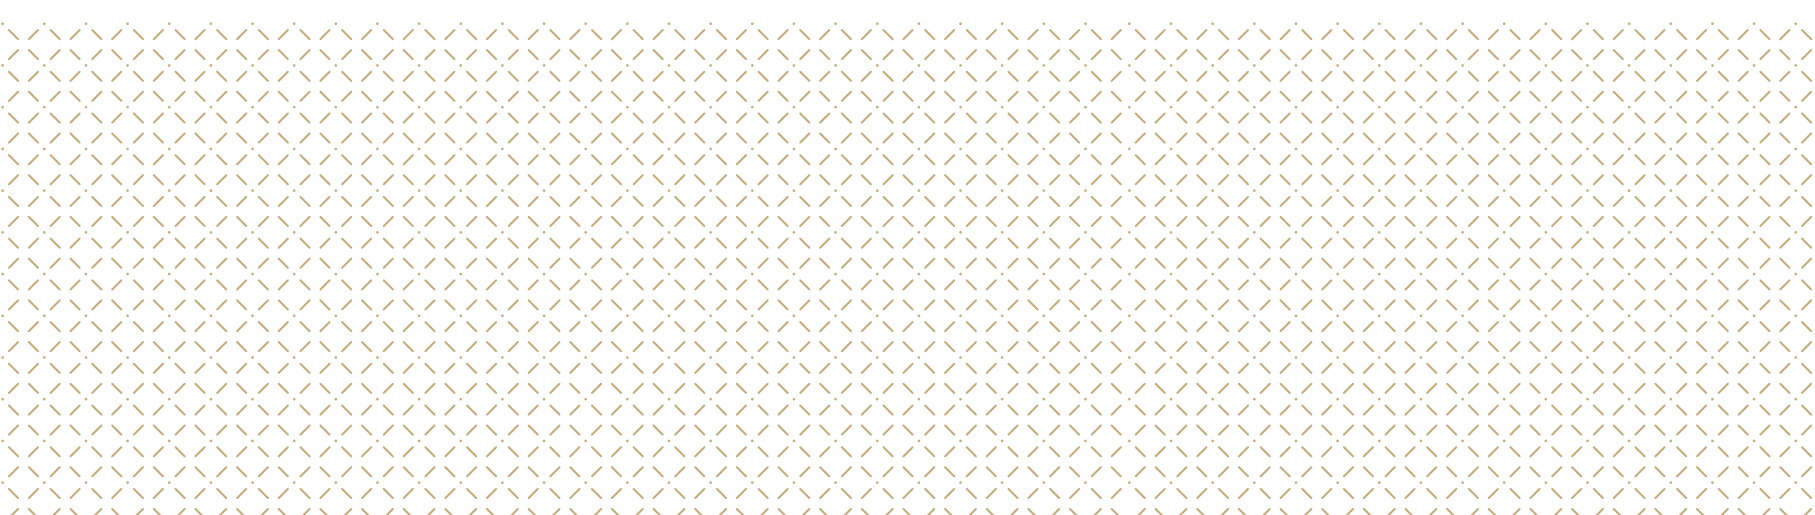

Through the use of RIPERLAMP's products, special atmospheres are created, inviting anyone to spend a pleasant time surrounded by art and design. Since 1985 we work towards establishing our company as a synonym of quality, in order to position us as one of the most important decorative lighting and furniture companies in the world.

Inspirado por la estética de los grandes jardines de la nobleza durante el siglo XVI, producimos impresionantes piezas decorativas que reflejan los elementos orgánicos más atractivos, incluso representaciones artísticas de las tendencias más contemporáneas. Bajo la colección Outdoor, presentamos piezas de cualquiera de este tipo de artes.

Todos los modelos de exterior cuentan con un grado de protección IP65, que los preserva del agua, polvo o humedad, protegiendo de daños al sistema eléctrico.

Trabajamos con los materiales más exquisitos, como el cristal de Asfour o Swarovski, latón fundido en nuestras instalaciones por eminentes artesanos y una multitud de elementos que hacen de la durabilidad y calidad no solo una obligación, si no también un valor corporativo.

A través del uso de los productos RIPERLAMP, se crean atmósferas especiales, invitando a pasar un agradable tiempo rodeado de arte y diseño. Desde 1985 trabajamos para establecer nuestra empresa como un sinónimo de calidad, tratando de posicionarnos como una de las empresas más importantes en materia de iluminación decorativa y mobiliario.

Riperlamp's Excellence

Excelencia Riperlamp

We at RPERLAMP focus on product excellence, both for its finish and process. Therefore, we use a set of norms and standards that must be accomplished in order to achieve the high value determined by the firm.

Our integrated system of quality management is certified by the ISO 9001, which guarantees efficiency in customer service and product excellence. This integrated system sets the guidelines for planning, resources and processes.

Regarding our quality control, in RIPERLAMP we set exhaustive checks though the whole production process, ensuring a superior product which satisfies our customer's needs. These exams are done in 5 different phases of the process:

- 1 - Raw materials and goods are inspected in the reception area.
- 2 - Right after the first machining. We go through every piece.
- 3 - A third exam is done at the reception of partially finished goods.
- 4 - Right after applying the finishing touches to the pieces and before assembly, a fourth inspection is done, in order to ensure that the colours are to the highest levels.
- 5 - Finally, right before packing products are approved after scrutiny of the Quality Manager.

These main points explained previously and the surely high-quality standards are officially proved by the following seals of quality:

RIPERLAMP busca siempre la excelencia en el producto, tanto en su acabado como en su proceso, por lo que utilizamos unas normas y unos estándares que deben de cumplirse para alcanzar el alto valor determinado por la empresa.

Nuestro sistema de gestión de calidad está certificado mediante la norma ISO 9001, la cual garantiza nuestra eficiencia en el servicio al cliente y la excelencia en el producto. Este sistema define las directrices a seguir en materia de política de calidad de una organización, con competencias en planificación, recursos o procesos.

Respecto a nuestro control de calidad, en RIPERLAMP determinamos exámenes durante todo el proceso de producción, con los que certificar que estamos cumpliendo nuestros parámetros de calidad exigidos para crear un producto superior y que este sea satisfactorio para nuestros clientes. Esto lo hacemos en 5 situaciones distintas del proceso, los cuales son:

- 1 - Se revisa la mercancía y las materias primas en la zona de recepción.
- 2 - Tras el primer mecanizado del producto se vuelve a realizar un control.
- 3 - Durante la recepción de productos semielaborados o para mecanizar se establece otro control.
- 4 - Tras trabajar con el producto recibido, y antes del montaje final, se realiza un cuarto control, para cerciorarnos que el producto está en perfectas condiciones de uso.
- 5 - Y, por último, antes de embalar el producto para su expedición al lugar donde lo quiera recibir el cliente, se hace un control por el responsable de calidad, el cual tiene que dar el visto bueno a que todos los productos cumplen los parámetros predefinidos por nosotros como calidad.

Y para avalar mediante una autoridad oficial todo lo desarrollado anteriormente, lo demostramos mediante nuestros sellos de calidad:

Riperlamp's design department

Departamento de diseño Riperlamp

One of the fundamental pillars in our company is the design department. We believe that whenever a person relies on their talent to differentiate themselves, a product that transcends is born, and that is why, in our company, we look for new ways to achieve unique results.

Our designers have extensive experience in the lighting sector, have a large amount of knowledge about the product and take care of even the tiniest detail in the creation process. They work together, sharing all their training and expertise, through experimentation and creativity of each individual, we create products with unique and inimitable features.

At RIPERLAMP we are a great team, we are continually sharing our ideas and we all strive for a common goal, so the design department has a close relationship with the technical office when it comes to creating prototypes and they are also involved in the production process, since our products, both for their finishes and design, can only be achieved by craftsmen who feel a deep respect for art and its procedures.

Uno de los pilares fundamentales en nuestra compañía es el departamento de diseño. Creemos que cada vez que alguna persona se apoya en su talento para diferenciarse, nace un producto que trasciende, y es por esto, que en nuestra compañía buscamos caminos nuevos para lograr resultados únicos.

Nuestros diseñadores tienen una extensa experiencia en el sector de la iluminación, poseen una gran cantidad de conocimiento sobre el producto y cuidan hasta el más mínimo detalle en el proceso de creación. Trabajan de forma conjunta, compartiendo toda su formación y maestría, pero a la vez lo hacen de forma individualizada, ya que dotamos de un equipo de gran talento, por lo que, mediante la experimentación y la creatividad propia de cada individuo, logramos alcanzar productos con rasgos singulares e inimitables.

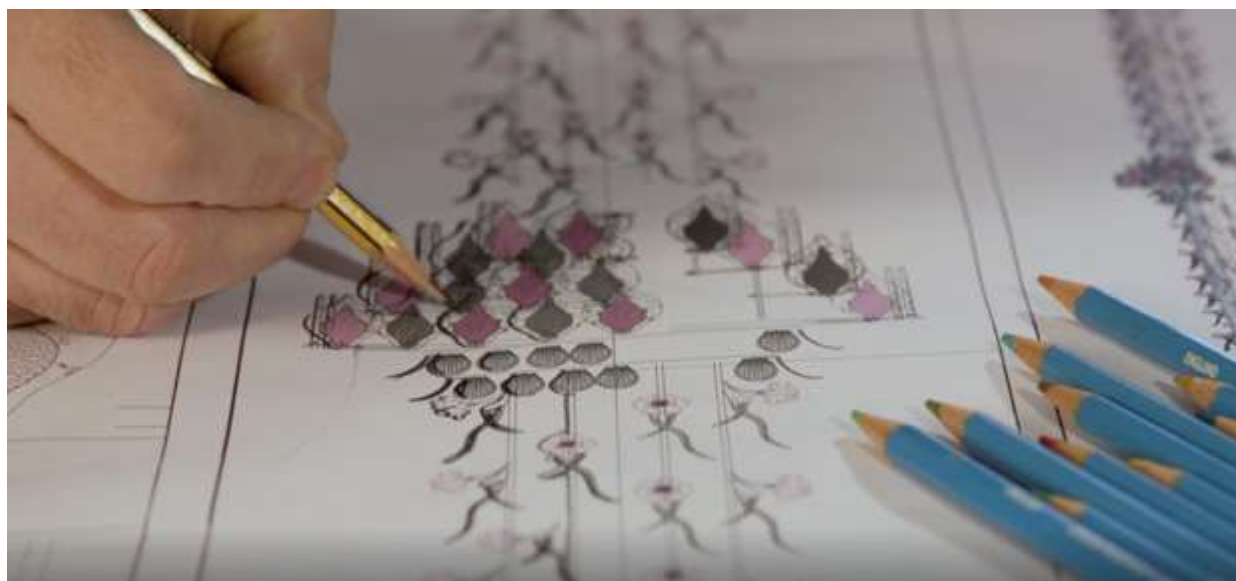

En RIPERLAMP somos un gran equipo, estamos continuamente compartiendo nuestras ideas y creemos que todos los departamentos somos uno, así pues, el departamento de diseño tiene una estrecha relación con la oficina técnica a la hora de crear prototipos y también se involucran en los procesos de fabricación, puesto que nuestros productos, tanto por sus acabados como por su diseño, solo se pueden lograr mediante artesanos que sientan un profundo respeto por el arte y sus procedimientos.

Custom service

One of the main pillars of our strategy as a company is the custom service. Where we tailor lighting instruments to the needs of our customers.

At RIPERLAMP, we light up your ideas. Design is the soul of the firm and this is the core idea that allows architects and interior designers to create unique spaces through the use of light.

Since the birth of RIPERLAMP in 1985, the ambition was to create inspiring pieces that are loved. In order to achieve that, we are constantly striving for perfection at every level of our designs. Throughout these years, RIPERLAMP has become a specialist in designing and producing decorative lighting instruments both for residential and commercial use, as well as the ability to custom projects.

In order to create custom-made products, RIPERLAMP gathers a customer oriented professional team. Thanks to their broad experience, the team is able to provide the best solution for our customer needs.

After receiving customer requests, the design and technical department analyze and look for solutions. In order to ensure that both are in the same page, our team sends a proposal with technical drawings and 3Ds if needed.

Once feedback is received and after applying the modifications needed, RIPERLAMP is able to provide prototypes to ensure that the needs are met.

Next step is to produce the custom lighting product within our headquarters in Valencia. Ensuring a high level of quality and short lead times.

At the end of this process, the result is a unique product that will definitely stand out, which is achieved thanks to the high level of craftsmanship and expertise of our team.

Technology integration in smart design

By being specialists in all sorts of Lighting Projects, RIPERLAMP has gained and extensive knowledge in technology integration in smart design. Therefore, we provide different solutions which can be used both in new and existing facilities, adjusting to any kind of necessity.

Below are presented just some of our solutions, in order to solve any kind of doubt and integrate technology in smart design, please contact us as export@riperlamp.com.
