

LIGHTING

MADE IN ENGLAND

THE LONDON TOWNHOUSE TABLE LIGHT COLLECTION

The table light collection known as The London Townhouse Edition, was inspired by the notion to furnish a luxury residence of architectural distinction with a collection of lights that work in harmony with exquisite furnishings, carefully chosen colour pallet and immaculate décor.

The collection consists of six table lights created using prime materials such as bronze, brass, marble and glass. It encompasses tall elegant glass on glass styles to more contemporary spherical glass and marble combinations, both to suit modern and elegant interiors and offering a variety of lights in different dimensions that are illuminated with a soft ambient glow to soften and balance a sophisticated interior.

Taking references from the classic architecture of London squares and facades, the linear nature of the pieces reflects elegant lines of columns and arches replicated throughout Palladian Georgian terraces and iconic squares. These terraces and squares that surround the CTO studio and showroom in London have provided constant inspiration from the sheer symmetry of the flawless architectural stone carvings and metal railings.

THE SIGNATURE CLOUDESLEY CHANDELIER COLLECTION

Describing the cloud like formation of its namesake, Cloudesley it's also the name of the street home of CTO Lighting Showroom in London, where it resides in Georgian opulence.

Reflecting an era of grandiosity, the repetitive oval forms of the glass when illuminated bring about a heavenly effect. Each oval opal glass shade arranged with an almost poetic rhythm. It is a signature CTO statement chandelier.

Experimenting and revisiting spherical and elliptic cloud like forms of traditional glass shades has resulted in a statement piece with soft curves where texture and light bring a modern approach to a classic arrangement. Cloudesley revisits classical lines and brings them to modern and sophisticated interiors of today effortlessly.
